National Bulb Recycling

Recycling today for a Cleaner Tomorrow

Welcome

The NBR Recycling System 3-EASY Steps:

1. Contact us to start the service 732-455-8380
   - We deliver Recycling Containers to meet your needs
     - Lamps
     - Ballasts
     - Batteries
2. You fill the containers
3. Call us for a pick-up
   - We pick-up and provide empty Recycling Containers
   - You receive a Certificate of Recycling for each pick-up
   - You receive a tonnage report each year

NBR does NOTcharge any additional fees for:

- Recycling Containers
- Transportation
- Fuel surcharges
- Recyclingsurcharges

What types of lamps can be recycled? Types of lamps recycled include:

- Straight Fluorescent (all lengths and diameters)
- Compacts Fluorescent (both with and without ballast)
- HID(High Pressure Sodium, Metal Halide, Biax, High Intesity, Bi-Metal)
- Shatter shield or Coated Lamps (all sizes)
- UV Lamps (all sizes)
- Halogen
- U-bend
- Flood Lamps
- Incandescent
- Circular

Improper fluorescent lamp disposal:

Fluorescent lamps contain mercury that is released as poisonous vapors if the tubes are broken. The mercury from one tube can pollute the air for miles and return to earth to pollute our water and land. Mercury can also be absorbed through the skin by handling broken fluorescent tubes. For these reasons, care must be taken to dispose of fluorescent tubes safely and properly.

For all of your Fluorescent Bulb and E-Waste recycling needs or if you have any questions and would like more information please contact

National Bulb Recycling, Inc.

PO Box 127,Avon by the SeaN.J. 07717
