

MOSAIC
SAMPLE MANAGEMENT SOFTWARE

Mosaic SampleBank™ software - sample management simplified

- ✓ Pre-configured
- ✓ Automation ready
- ✓ Inventory tracking
- ✓ Fast to deploy
- ✓ Scalable
- ✓ Full audit trail

Mosaic SampleBank™ is a fully optimised, cost-effective software package for small molecule and biological inventory management. SampleBank combines inventory tracking, sample ordering and workflow management functionality into a pre-configured system that enables seamless start-up. It also has the capability to integrate with an extensive range of laboratory instrumentation and automated stores.

Mosaic SampleBank helps you to:

- Revolutionise your workflows with error free supply chain management
- Organise your samples as a corporate resource rather than existing in silos
- Free your scientists from tracking down samples to focus on research
- Get the most efficient use from your automation and other capital equipment
- Provide a scalable solution able to grow to meet your future demands
- Encapsulate best practice for your sample management requirements, based on over 15 years of industry knowledge
- Hit the ground running – it's fast to deploy and simple to implement

MOSAIC
SAMPLE MANAGEMENT SOFTWARE

Mosaic SampleBank™ functionality includes:

Inventory tracking

Never lose a sample. See exactly which samples are where at any time. SampleBank also allows a diverse range of sample meta-data to be defined and recorded in the same system. This includes information on small molecules and DNA-based or blood-derived samples.

Ordering

Powerful, intuitive ordering interfaces for a guaranteed and seamless sample supply chain.

Automation integration

Reduce human errors in sample preparation and associated data handling by integrating a wide range of automated storage, liquid handling and dry powder handling systems. Mosaic software can also interact with any liquid handler using file exchange.

Sample processing

Know everything that has happened to your samples. In-built workflow management optimises manual or automated sample preparation and incorporates a comprehensive audit trail.

Mosaic SampleBank software offers you the benefits of industry best practice in sample management, packaged in a format that is cost-effective and rapid to deploy.
