## Service Agreements

You have important work to do and the last thing you need is to worry about your lab automation equipment. Get the best peace of mind with a DCM BioServices Full Coverage Service Agreement. Our service agreements include periodic maintenance, priority on-site repairs, and so much more. Call us today and see how a service agreement can help keep your lab running smoothly!

## Periodic Maintenance (PM)

Don't let an equipment failure sneak up on you and derail your progress. At DCM BioServices we provide regular periodic maintenance for your lab automation equipment. Scheduled cleaning and inspection will extend the life of your equipment. Give yourself the peace of mind that you've done everything you can to keep your lab automation running smoothly.

Call today!

## Verification and Calibration

Precision and accuracy are important parts of the work that you do and most labs are required to adhere to certain standards. DCM BioServices can provide fast and reliable verification and calibration services for your lab automation equipment. Call us and schedule an appointment today.

## Repair Service

Sometimes parts fail and your system goes down. When that happens you need to be back up and running fast and at costs that are budget friendly. At DCM BioServices our Field Service Engineers can get your lab automation equipment repaired quickly and efficiently with OEM and manufacturer approved parts. We offer repairs both on-site, in your lab, and in-house at our repair depot.
