

HCS ANALYSIS

AUTOMATED \ DEEP LEARNING POWERED \ CLOUD SCALABLE

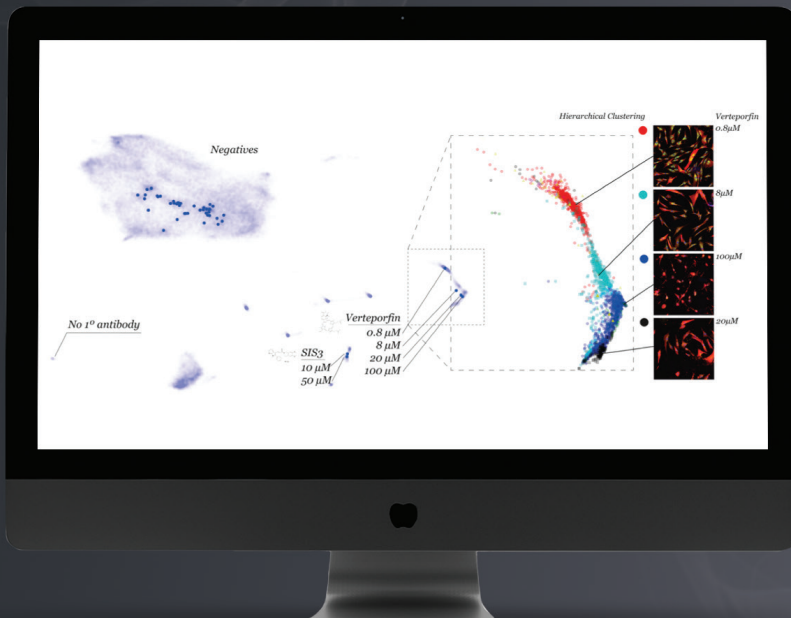

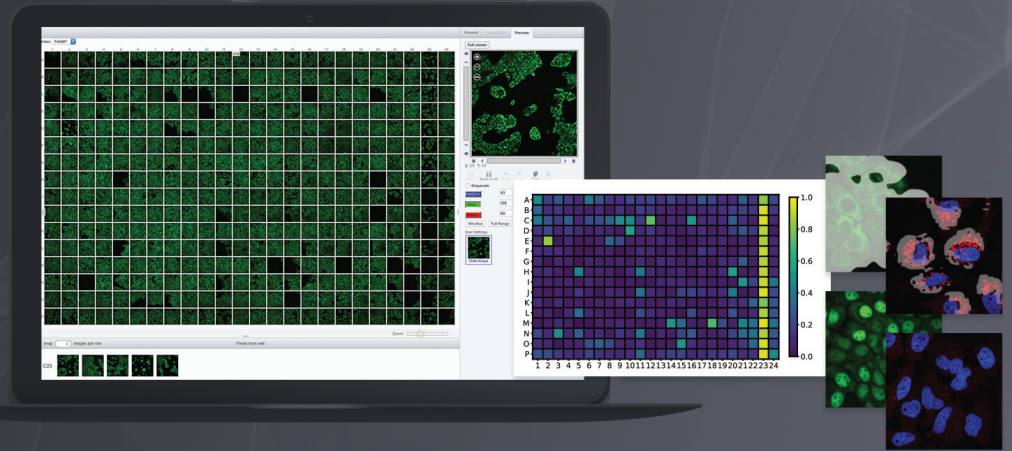

HIGH CONTENT DEEP LEARNING PLATFORM

Phenomic AI's Deep Learning Platform enables scientist to extract meaningful insights from any phenotypic screen automatically

DRUG SCREENING

Our platform automatically learns phenotypic patterns in control wells and uses them to score treatment wells.

PHENOTYPIC PROFILING

Often phenotypes cannot be entirely modeled by controls. Our platform uses an un-supervised approach to cluster and visualize treatments by their phenotypic effects.

CLOUD SCALABLE

Our platform is deployed entirely in the cloud, supporting the ever-growing volume and complexity of phenotypic screens.
