

Pacejet enterprise shipping for Microsoft Dynamics 365 Business Central

The only complete freight quoting and shipping solution built for Dynamics Business Central customer

The Pacejet cloud-based shipping platform harnesses Dynamics 365 Business Central technology to power realtime transactions with more freight, parcel, 3PL carriers, and shipping services than any other application. Now users can increase visibility to lower costs and improve efficiency and the customer experience.

Offering shipping solutions that give you an edge

- Freight quotes with rate-shop reduces shipping costs and improves shipping estimates by displaying LTL, parcel, 3PL services, prices, transit times in real-time.
- Quote in estimates, orders, fulfillments, ecommerce to offer the best shipping services at the lowest prices with fewer charge-backs and no surprise service fees.
- Complete freight management with bill of lading via Fedex freight, UPS freight, and many other national and regional LTL carriers and 3PL services via the Pacejet carrier network.
- Pack products into containers, scan verify, and integrate with scales to record dimensions, weight, class, and item detail for more accurate shipping, better tracking, and improved paperwork.
- Negotiated rates, list prices, pricing rules let you define your shipment pricing and charge customers based on your contract costs to maximize cost recovery while remaining price competitive.
- Freight terms, mark-up, third party accounts, billing, and other financial controls manage how customers or third parties are billed.
- Quickly scan, pack, consolidate, rate-shop, batch as you automate Dynamics 365 Business Central for large batches or streamlined workflows.

What customers are saying

"Pacejet has all the shipping features we need, while giving our customers the most cost-effective shipping options."

- Chris Gripp, President, SignWarehouse®, Inc.
