POWER BI

If you can dream it, we can build it.

With **Microsoft Dynamics 365 Business Central** and companion products like Power BI, CRM, Flow, SharePoint, CMMS/EAM, Anveo and Continia, the possibilities for integrating your business are infinite. To get the job done, you need a partner who takes the time to listen, who understands your business, and knows how to make Business Central adapt to the way you work – and not the other way around.

Liberty Grove Software is one of North America's most respected Dynamics 365 Business Central/NAV partners, with a two-decade track record of successful implementations, upgrades, and custom development projects. Our consultants are experts who have written several of the most popular books on NAV, presented at international conferences and include Microsoft MVPs and Lead MCTs.

As a Microsoft ERP Partner, Liberty Grove Software specializes in enterprise solutions for manufacturing and distribution, manufacture to order, service management and food and beverage companies. Liberty Grove is one of the most experienced upgrade specialists, and offers a no-risk fixed-price upgrade with no downtime.

Many Summit attendees are looking for a smooth path for upgrading to Business Central from NAV. Stop by booth 1416 to enter a drawing for a Business Central Migration Strategy consultation for your company worth \$1000.

We invite you to talk to us about your toughest BC and NAV problems. Come visit us at Booth 1416, or give us a call 630-858-7388 to set up a no-obligation complementary consultation today.

LIBERTY GROVE SOFTWARE

DEVELOPMENT

Whether we're helping end-users or other Microsoft partners with development, we leverage our deep functional and technical knowledge to architect, build, test and deliver outstanding solutions.

For clients who prefer to be hands-on with development, we can also help through our development transformation training. Learn how to move from C/AL to AL and adopt new best practices.

FIXED-PRICE UPGRADES

Visit us to learn about how we can upgrade your system to Business Central for a fixed price. With hundreds of successful upgrades under our belt, we know how to get the job done. Avoid hidden costs with an upfront free quote.

NAV TO BC365 MIGRATION

With the demise of the old development environment, upgrading has evolved into a more extensive process with special considerations for customizations. Our team will work with you to define your upgrade options and costs, so you can decide whether to upgrade or re-implement.

CONSULTING

Our team of experts can help you figure out your challenges and how to handle them in NAV/BC. We have helped many NAV users and partners by doing the heavy lifting. Your special requirements need our special team.

TRAINING

Getting up to speed on a new version or new functionality is a challenge. We can provide you with a tailored training program suited to your needs and budget.

FINANCIALS

This core Business Central/NAV functionality is often under-utilized. We will help you understand non-used functionalities and how to apply them to your organization as well as review your current approaches and determine how to optimize them for better cash flow.

MANUFACTURING

There is a lot you can do with Manufacturing and an infinite number of ways you can set it up to improve your efficiency and economy. Our team, of experienced manufacturing experts, will work with you to determine the best setup for your organization. We will help you consider the different ways that each part of manufacturing is used, by finance, planning, supervisors and operators alike.

TRACKING + TRACEABILITY

To monitor product safety, freshness standards and to meet government regulations, you need robust functionality and processes to ensure that you know what came in and when and where it went. We understand that an effective system relies on both technology and people. We will help you get them working together effectively.

FOOD & BEVERAGE

Leverage our years of work in this area to accelerate your project and get the tools you need to manage your operation. DynamicsFoodERP is a scalable comprehensive food solution that you can use to address your key control needs.

ADD-ON APPS

Our most successful projects rely on a core setup of robust add-ons. See us to learn how Anveo Mobile & Web Apps, EDI, Continia Expense Management and Document Capture have simplified our customers' NAV/BC implementations. If you need to maintain your equipment, our CMMS/EAM solution will fill in the missing functionality.

POWER BI

As your business evolves your users need access to business data. Our PowerBI team knows how to help you define requirements and get the right information into your users' hands.

LGS WORKS WELL WITH OTHERS!

Liberty Grove is experienced working in multi-layered development environments, either directly for end-users or cooperating with other Microsoft Partners, ISV vendors, in-house development teams, and corporate IT Departments.
