# DYNAWAY

ENTERPRISE ASSET MANAGEMENT

Maintenance Management Excellence

Microsoft has acquired the rights to Dynaway EAM, which will soon be part of the standard package of Microsoft Dynamics 365 for Finance and Operations as **Asset Management** module.

At Dynaway, we are **asset management** experts with extensive experience end exclusive focus on equipment maintenance. We can help you reach the next level in your maintenance management strategy!

dynaway

Take advantage of our in-depth knowledge of the Microsoft Asset Management Module

Proof of concept

Are you considering implementing Microsoft Asset Management module but want to determine whether it's a good fit for your business?

A proof-of-concept service is a project that we create specifically for your business to test whether the module is the right solution for your organization.

Implementation

Select Dynaway as your implementation partner for the next maintenance management project.

Dynaway has a proven method and a successful track record of completing and supporting EAM implementations with the aim of moving customers' maintenance management organizations to the next level.

Dynaway Academy

Dynaway EAM Certification Course (3-day Training)

This course provides you with up-to-date knowledge of Dynaway EAM on Microsoft Dynamics 365 for Finance and Operations, including hands-on experience with the main features of the EAM module.

Solutions for

Asset Management

Seamless integration with Microsoft Dynamics 365 for Finance & Operations and Asset Management module

# Mobile EAM

Work Order Execution

Mobile EAM allows your maintenance workers to report status and progress on **work orders in real time**, **consume spare parts**, and quickly and efficiently complete work orders on-site.

Maintenance Scheduling
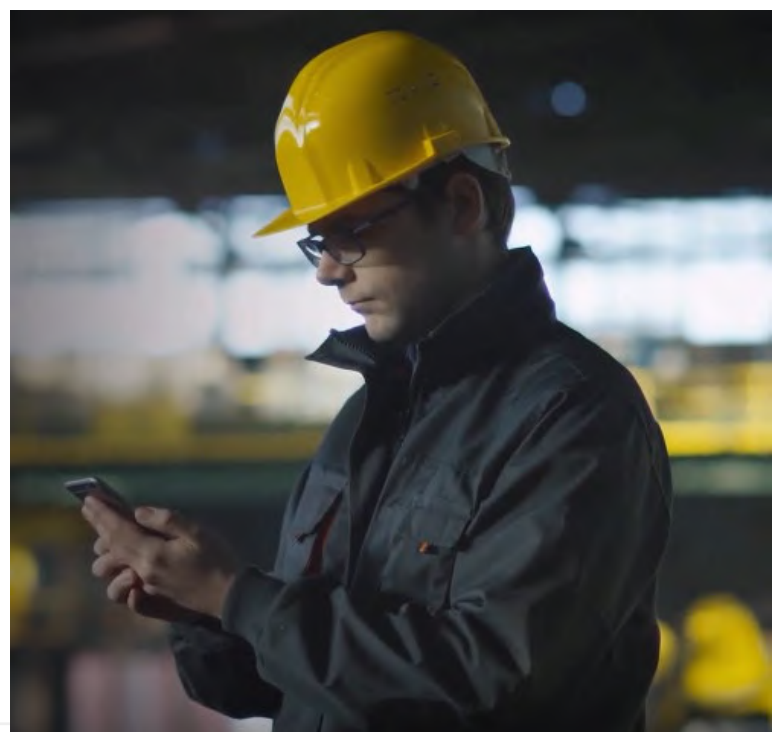

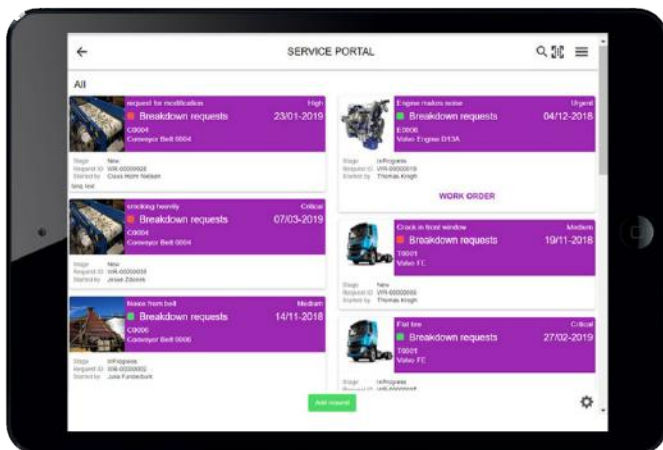

Flexible and optimized work order planning

The Planning Board module for maintenance planners allows you to quickly and **effectively plan unscheduled work orders** to ensure a cost-efficient work environment for asset-intensive businesses.

Service Requests

Efficient management of maintenance requests

The Service Portal allows you to quickly and easily create Maintenance Requests on objects, for example, when a machine operator detects an error, a faulty setup, or a need for inspection on a machine.

How to engage with us during AXUG 2019?

- During the event, you can find our team at **Booth** #731;

- On Wednesday, October 16th, 3.15 pm - 4.15 pm join our **session**;

- Want to have a **meeting** during the Summit? Book time in our calendar!
