Electronic Payment Processing

Simplify Payment Acceptance | Fulfill PCI Requirements | Accelerate Growth

Integrate **Credit Card and eCheck Processing** directly inside your Microsoft Dynamics solution to minimize human error, delays associated with disconnected systems, and manual reconciliation. Features include batch processing, level 2 & 3 data processing, and activity reports.

Customer Payment Portal

Improve Cash Flow | Automate Accounts Receivable | Overcome PCI Barriers

Nodus' **Customer Payment Portal** offers secure and convenient online bill presentment and payment collection for Microsoft Dynamics users. Send invoice notifications to your customers and let your customers view and pay their invoices online while also eliminating double entry, wasted man hours, and endless journeys down a paper trail.
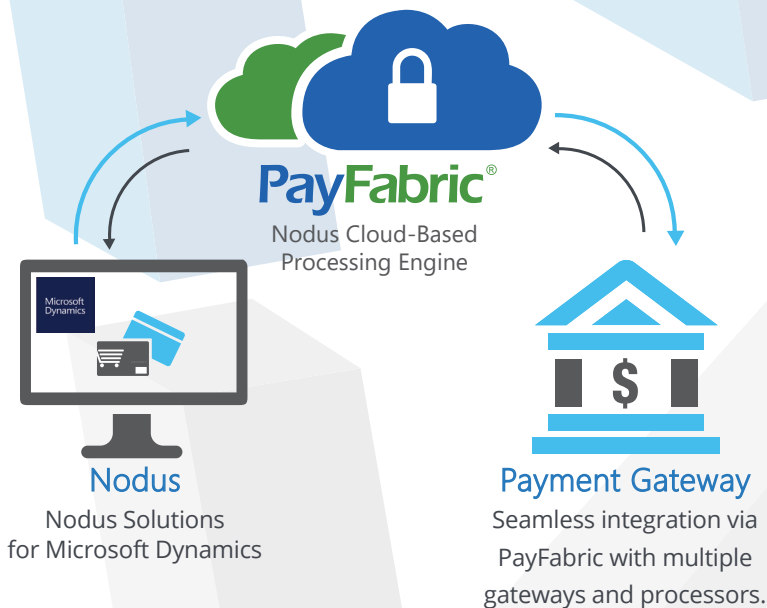

B2B & B2C eCommerce for Microsoft Dynamics GP

Automate Web Orders | Simplify Payment Acceptance | Foster Brand Affinity

eStore Solution Stack (eSSS) is an enterprise level eCommerce solution that automates the handling of web orders and fulfills those orders through Microsoft Dynamics GP.
