

# BOOTH #527

## JOIN US DURING OUR SESSIONS:

Wednesday, October 16, 2019 - 9:45 - 10:45 am  
("IF02 - How to Bring your Engineering Team Onboard with Dynamics 365FO")

Wednesday, October 16, 2019 - 3:15 - 4:15 pm  
(Bluestar PLM Showcase)

## EXPO HOURS

Tuesday, October 15, 5:00 PM - 8:00 PM  
Wednesday, October 16, 12:00 PM - 2:00 PM  
& 5:30 PM - 7:30 PM  
Thursday, October 17, 11:30 AM - 1:30 PM  
Friday, October 18, 11:00 AM - 1:00 PM

## THE "MISSING LINK" BETWEEN ENGINEERING AND MANUFACTURING

### BLUESTAR PLM

Our software solution, Bluestar PLM, is a product lifecycle management (PLM) module imbedded in and built on top of Microsoft's premier cloud ERP platform, Dynamics 365 for Finance and Operations and AX (D365/AX). By having PLM and ERP run inside a single solution, engineering and operation teams can be fully integrated with one another.

Engineers and CAD users are enabled to seamlessly share design data and product documents with downstream ERP users who depend on it for purchasing, manufacturing and related activities. In return, engineers are granted access to indispensable data on logistics and transactions such as prices, stock and lead times, so that price awareness and other logistical considerations are easily incorporated into product designs.

### OUR SOLUTIONS

#### PLM embedded in Microsoft Dynamics 365/AX

By merging ERP and PLM environments into a single collaborative solution, it enables manufacturers to collaborate around a single set of product data across departments, locations, suppliers and customers;

#### CAD Integration

A bi-directional exchange of information rids an organization of redundant data entry and fragmented data, while raising data integrity for improved productivity;

#### Product Configuration

Manage the entire configuration process from quotation through engineering and production in a single system;

#### Quality Management System

Provides a Dynamics 365 for Finance and Operations & AX based environment for quality management based on the ISO 9000 standard;

#### Engineering Change Management

An integrated platform for creating, planning and implementing engineering product changes while taking all dependencies in sales, engineering, purchasing, and manufacturing into account;

#### Business Process Management

Enables users to streamline and standardize their corporate business process by defining best practices for the different activities within the organization;

#### Bluestar Reuse

Through the power of Machine Learning, new products can be efficiently designed by retrieving related parts already existing in the product database.

## THE **"MISSING LINK"** BETWEEN ENGINEERING AND MANUFACTURING

### BLUESTAR PLM ON AXUG

**Wednesday, October 16, 2019 - 9:45 - 10:45 am  
(Session)**

"IF02 - How to Bring your Engineering Team Onboard with Dynamics 365FO"

Do you want to know how actual users experience Bluestar PLM inside D365/AX?

Then attend our Partner Session where Rick Trask from Nonin and Brad Windisch from Rotork tell their stories, who have both successfully implemented Bluestar PLM in their respective organizations.

**Wednesday, October 16, 2019 - 3:15 - 4:15 pm  
(Bluestar PLM Showcase)**

Partner Solution Showcase Presented by Bluestar PLM

As a Gold Sponsor this year, we at PDM technology have the privilege of showcasing to you how Bluestar PLM can improve the management of product data, by running inside Dynamics 365/AX.

Come by and witness Dan Fite, Business Development at PDM technology, present to you, PLM embedded in Microsoft's cloud-based solution D365/AX.

At the end of the showcase, Dan Fite will hold a Q&A session, where he will answer any questions you may have concerning ERP, PLM, product data management and anything in between.

**MEET US AT: BOOTH #527**

Meet the Bluestar team, where we excitedly wait for you to come by and experience our solutions or chat with our friendly staff - we want to learn more about you and for what purposes you use your Microsoft Dynamics/AX solution.

See our solutions in action or maybe even experience our VR application for Bluestar PLM, and step into the shoes of a manufacturer or engineer, as you get to interact with parts and objects first hand, in a virtual 3D environment
