duplicare
Dynamics | Duplicate | Prevention

Make duplicate records a thing of the past using bespoke rules to de-duplicate, merge and standardise multiple records all at once within your MsDyn CRM.

data8 duplicare™ is an automated de-duplication tool for MsDyn 365. It offers the ability to merge multiple records with all fields, and also customisable quick merge bulk de-duping of existing records, all within MsDyn 365.

data8 duplicare provides advanced duplicate prevention at point of entry, and the ability to merge multiple records with all fields, including custom entities, at point of entry.

data8 duplicare™ dashboard provides a powerful tool for both CRM and sales professionals within the enterprise to monitor where and when duplicates are being created, and by whom!
