DCAA-COMPLIANT MICROSOFT DYNAMICS SUITE OF SOLUTIONS FOR GROWING GOVERNMENT CONTRACTORS

Microsoft Dynamics 365 for Government Contractors allows program managers to make decisions now that would be in the best interest of the program. You can view the contract from an overall perspective and from a very granular level. Program managers can drill down for detailed job costing and labor utilization. While executive users, such as chief operating and financial officers, can easily spot trends with contract profitability and managing indirect rates.

Accounting & Finance

DCAA, FAR and CAS compliant Financial Management include: General Ledger, Accounts Receivable, Accounts Payable, Fixed Assets, Bank Account Management and Cash Flow Management/Forecasting. In addition to these core capabilities, the solution supports the ability to manage multiple operating companies including consolidations with multiple reporting and operational currencies.

Project Management

Provide project managers with intuitive dashboards to review, monitor, and approve all costs and time impacting their projects. Ensure project deliverables reflect the terms of the contract, approved work, and expenses. Visualize accurate cost, effort, and revenue, and achieve predictable project delivery using robust project planning capabilities including native Microsoft Project integration.

DCAA Compliant Software for Government Contractors

For more than 15 years, PVBS has been the top Microsoft partner for DCAA compliant software and cloud solutions. If your business sells, manufactures or offers professional services to the Federal Government, you need Microsoft Dynamic from PVBS.

Human Resources & Recruiting

Tailor your GovCon hiring process with Microsoft Dynamics 365 and the power of LinkedIn. Share candidate information from a centralized location, while empowering hiring managers with visibility into candidate profiles, assessment tools, interviewer assignments, simplified interview scheduling and mobile feedback. Get the right insights for the right action to improve your workforce planning.

Sales & Marketing

Find and connect with the right partners and grow sales relationships by combining LinkedIn Sales Navigator and Dynamics 365 for Sales. Go from data to deep insights with real-time dashboards that have interactive and drill-down capabilities. Seamlessly connect business process data with Office 365 and LinkedIn data to guide partners and sub-contractors throughout your sales processes.

Purchase Order Management

Managing the purchasing process is a critical function for all Government Contractors that need to procure inventory, ODCs, subcontract labor or Fixed Assets. Dynamics 365 offers capabilities to procure products and services from the purchase requisition process, through generation of purchase orders and finally into the purchase invoicing process. Integrated document management and tailored workflow approval.

WITH MICROSOFT DYNAMICS 365 FOR GOVERNMENT CONTRACTORS, BUSINESSES CAN TAKE ADVANTAGE OF:

Power Business Intelligence (BI)

The business intelligence and dashboard solution from PVBS is powered by Power BI which is a suite of business analytics tools that deliver insights throughout your organization. Leverage our standard dashboards and reports for Government Contractors or produce your own reports and dashboards, then publish them for your organization to consume on the web and across mobile devices.

Web Time & Expense

Microsoft Dynamics T&E resides in the same database and application framework as the rest of the solution and is accessible through a web browser. It is flexible enough to consider any variables that may occur, so that time can be reported at the task level or at any acceptable level of the work breakdown structure (WBS). The process flows effectively to allow you to properly and quickly invoice your Government client.

Inventory Management

Inventory management capabilities include the ability to track serial or lot numbers, identify preferred or alternate vendors for purchasing and identify reorder policies for procurement. The solution provides visibility into all aspects of managing your perpetual inventory; from current quantities assigned to a project, to quantities on hand, on a sales order, purchase order or a service order.

Indirect Rate Management

An unlimited number of indirect cost pools can be allocated based on multiple criteria such as cost, square footage, head count, or even a percentage. Furthermore, the automated allocation routine allows the system to perform and retain multi-tier allocations. Indirect cost are allocated on an actual and provisional basis, both these allocated cost are then recorded in the general and project ledgers.

Preview Microsoft Dynamics 365 for Government Contractors

Schedule a demonstration of the powerful Microsoft Dynamics NAV for Government Contractors from PVBS and you'll find out why 90% of our attendees agree it is better than the system their company currently runs.

Microsoft and PVBS have worked closely with hundreds of government contractors over the past fifteen years to ensure that our offerings have what they need to succeed and grow.

In addition being fully FAR, CAS and DCAA compliant, Microsoft Dynamics NAV for Government Contractors from PVBS allows contractors to manage both commercial and public sector businesses using a single system, rather than relying on dual accounting systems.
