

Electronic Payment Processing

Simplify Payment Acceptance | Fulfill PCI Requirements | Accelerate Growth

Credit Card Advantage (CCA) processes credit card and ACH/eCheck transactions directly within Microsoft Dynamics GP. Features include batch processing, level 2 & 3 data processing, and activity reports.

CRM Charge allows CRM users to instantly process electronic transactions directly from their CRM, including credit cards and ACH/echecks, and have those payments integrate with their ERP in real-time.

Customer Payment Portal

Improve Cash Flow | Automate Accounts Receivable | Overcome PCI Barriers

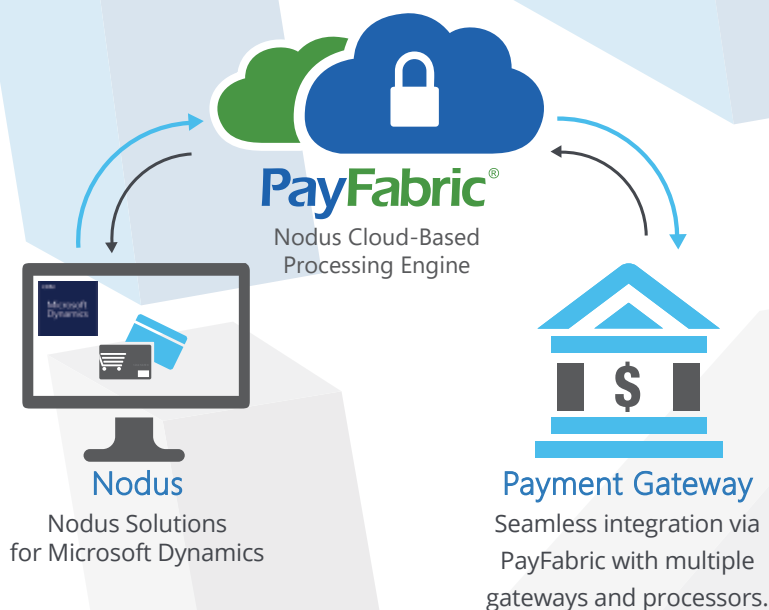

ePay Advantage offers the latest in online bill presentment and payment technology for enterprises. Send invoice notifications to your customers. Let your customers view and pay their invoices online. Eliminate double entry, wasted man hours, and endless journeys down a paper trail.

B2B & B2C eCommerce for Microsoft Dynamics GP

Automate Web Orders | Simplify Payment Acceptance | Foster Brand Affinity

eStore Solution Stack (eSSS) is an enterprise level eCommerce solution that automates the handling of web orders and fulfills those orders through Microsoft Dynamics GP.

Store Payment Data Securely in the Cloud

PayFabric allows end-users to enter their sensitive payment information into an embedded hosted payment page for secure credit card and ACH/eCheck processing and storage.
