Microsoft Dynamics GP Payroll Integration

Specializing in bi-directional Dynamics solutions that are scalable, affordable, seamless and agnostic!

Features

Our Sierra integration synchronizes employee and payroll data between **Microsoft Dynamics GP** and **TimeMaster™** with the click of a button.

Our standard out-of-the-box integration is bi-directional and updates employee information, including department, job, supervisor, and much more directly into TimeMaster directly from **Microsoft Dynamics GP** so there is no double entry. It also interfaces your TimeMaster time and attendance data including time punches, pay codes, job codes, absence codes, disbursements, shift codes (and more) directly into **Microsoft Dynamics GP**, making payroll a breeze.

Highlights

Capable of supporting multi-company, each within its own database!

Table Data Synched:

US Payroll Module

- *Employee Data Table*
  Over 30 fields, employee and organizational information

HR Module

- *Union Table*
  Seniority Dates

Miscellaneous Module

- *Internet Table*
  Email Address

Optional Features:

- *Choose default value override in GP for dept., position, pay rate rather than timecard values*
- *Default batch codes <u>or</u> user defined batch codes*

Bi Directional Interface:

- *Configure and GO! Enter data once, changes port to GP/payroll database and/or time and attendance database*

Technical Support:

- *Knowledgeable and responsive support team from project start and beyond...*
