Dynamics Resources Worldwide

PwC considers clients' key business imperatives and provides business-led, Microsoft-technology-enabled solutions to meet their goals

Allowing us to deliver customer success for our clients

Example: Accelerated ERP solution for global online retailer

Issue: A large U.S. online retailer with over 250,000 professionals created an independent spin-off of its previous publicly-held corporate parent company - subject to an 18-month transition-services agreement.

Action: PwC was engaged for an eight-week study focused on defining business and technical capabilities, along with a fit/gap assessment of the Microsoft Dynamics AX® platform. The Dynamics platform was selected as a leading candidate due to its ability to provide the required functional-area strength and breadth, as well as its ability to reduce costs, improve speed of deployment, and increase "time-to-value."

PwC & Microsoft: Aligned to create the competitive advantage

Microsoft recognizes PwC as a leading Global Advisory Partner based on reputation

Distinctive Approach	<p>Targeted, holistic, purpose-built solutions to provide the most value to our clients</p> <p>Business integration and Microsoft-technology-enabled approach to understand and solve business challenges</p> <p>View challenges using a cross line of service perspective, including tax, assurance, and advisory services</p>
Trusted Brand	<p>Trusted advisors recognized as specialists and thought leaders across various industry segments</p> <p>Known for deep industry, functional, technical, and process knowledge</p> <p>Multi-disciplinary portfolio of management, technology, and risk consulting capabilities</p>
Breadth of Capabilities	<p>One firm with global service delivery capabilities spanning advisory, tax, and assurance</p> <p>Deep understanding of local tax, accounting, and advisory issues in 157+ countries</p> <p>Proven, customizable methodologies and accelerators supported across multiple practices and implemented with Microsoft technologies</p>
