Proven Inventory and Asset Solutions

Panatracker®GP adds barcode accuracy and efficiency to Microsoft Dynamics® GP

Warehouse Management

Take your distribution, retail, or manufacturing processes to the next level:

- Validate **receiving** and **put-away** tasks and print barcode item labels.
- Manage **stock replenishment** activities.
- Setup **directed transfer** or **move** inventory for manufacturing, assembly, or restock requests for satellite locations.
- Complete validated **pick** and **pack** for accurate order fulfillment. Add validation logic for **lot** and **serial** tracked inventory.
- Record raw materials and components issued to **manufacturing** and **assembly**. Automatically generate barcode item labels when you complete **finished goods receipts**.
- Incorporate **pallet license plate** features to streamline data capture.
- Enter **sales orders** at customer stops or on the showroom floor.
- Capture a signature for customer **pick up** or **delivery.**

Stockroom Inventory

Utilities, maintenance and service organizations use PanatrackerGP to:

- **Receive** parts to stock or purchased for specific projects and jobs.
- Record the **issue** of parts inventory from the stockroom or truck.
- Complete **project accounting transfers** to remove parts from stock and assign to a project.
- Capture parts **returned to stock.**
- **Transfer** parts to replenish truck inventory.
- Schedule **stock counts** to validate your inventory quantities.

Fixed Asset Tracking

Track your fixed assets with a simple scan through PanatrackerGP to:

- **Tag** your assets with barcode asset labels.
- Capture details for **new asset additions** with support to create the corresponding purchase order receiving transaction.
- **Assign** assets to a group for later mass update to financial setup.
- **Update** physical attributes of the asset--including custodian and location.
- **Physically verify** assets by location, master asset, or custodian.
- Use the **asset group** assignment to identify assets to be retired or taken out of service.

Updating Microsoft Dynamics® GP in real time, Panatracker®GP is the trusted, reliable tool for managing inventory and assets.

We all understand the benefits of barcoding. PanatrackerGP is the reliable choice for barcoding in Dynamics GP.

- Each part of our product is designed for performance, from our use of Dynamics GP, to the native interface for your handheld computers, to our cloud-ready architecture.
- Our solutions are designed to be scalable, flexible, and easy to support.
- We don't just deliver a piece of software. We offer advice based on hundreds of implementations for companies just like yours. We can help optimize your tracking objectives.
- We know Microsoft Dynamics GP. Our product is designed to take full advantage of its strengths.
- Our architecture leverages your existing investment in Dynamics GP's inventory and fixed asset features.
- We expose and extend advanced features in Dynamics GP and augment them with powerful additional functionality.
- We listen as a partner, always thinking of how to improve your operations and our solutions.

Your evaluation starts with us listening to you. We offer consultative web demos to ensure our solution is the right fit. Our goal is to provide a quick return on your investment.

Warehouse Management

An embedded Warehouse Management Solution that adds control and efficiency for:

- Distributors
- Medical & Labs
- Food & Beverage
- Retail
- Manufacturers
- Services/Route Sales
- … and more

Packed with essential features and functionality. Scalable to meet more complex requirements.

Stockroom Inventory

PanatrackerGP Stockroom Inventory replaces paper-based tracking for:

- Utilities
- Industrial Manufacturing
- Spares and Repairs
- Maintenance Inventory
- Contractors and Trades
- Project-driven Industries
- … and more

PanatrackerGP's Stockroom solution reduces unpredictability and increases visibility for the repair and service supply chain.

Fixed Asset Tracking

Add barcode tags to capital and expensed assets you need to track. An ideal solution for:

- Schools
- Government Agencies
- Medical Facilities
- Data Centers
- Service Providers
- Enterprise Organizations
- … and more

Replace the Excel spreadsheets with a fully integrated solution with PanatrackerGP and Dynamics GP.
