Supply Chain Mobility Meets Microsoft AppSource

The Key to Lower Operating Costs and Higher Customer Satisfaction

Realize Maximum Value from Microsoft Dynamics 365 for
Operations with Streamlined Transactions

Match the agility and configurability of your Dynamics 365 for Operations system
with real-time inventory visibility and execution—anywhere.

DSI ScanWorkX is the first mobile data collection app selected as a Microsoft AppSource curated solution for Dynamics 365 for Operations. For supply chain leaders, that means it's now easier than ever to extend the performance of your ERP investment in the warehouse and beyond. Better yet, DSI ScanWorkX offers full WMS support, streamlined WHS implementation or a hybrid approach using the best of both.

Powerful Features to Enhance Your System Performance

DSI ScanWorkX supports on-premise, cloud and remote capabilities to provide a seamless experience no matter where work happens. Combined with the versatility of Dynamics 365 for Operations, ScanWorkX becomes a part of the system without modifying any existing features and adds high-powered functionality that was never before possible:

- Comprehensively enriched interface with an emphasis on the user experience
- Enhanced data entry logic that completes transactions faster to keep workers moving
- Complete control of all client devices with user-accessible parameters
- Powerful and integrated engine that runs on all of the most popular devices, and is accessible from anywhere
- Quicker system response times, more transactions and enhanced mobile capabilities

Visit **Booth #673** to learn more about how DSI ScanWorkX can extend system performance with the flexibility to provide a lower cost of implementation.

Solution Highlights

- DSI® ScanWorkX® meets Microsoft's highest standard for partner-developed software solutions, and is the only mobile data collection platform selected as a Dynamics 365 for Operations curated solution
- Enterprise Printing Platform (EPP)™ lets you design and print labels and reports, with printer management and automated media replenishment. EPP can stand alone or seamlessly integrate with ScanWorkX and WMD
- DSI ScanWorkX and DSI's EPP are both Microsoft Azure Certified platforms, with preconfigured virtual servers available for easy deployment
- Make timely, accurate deliveries with real-time data and dynamic route scheduling. Optimize service with remote access to customer and inventory information
