

Health for all

Your go-to for the study and practice of national, regional and international public health

“It is the norm for systematic reviewers at the LSHTM to include the Global Health database in order to be comprehensive”

Dr Bayard Roberts, The London School of Hygiene & Tropical Medicine

www.cabdirect.org/globalhealth

With over 3.1 million records, and growing by over 170,000 every year, Global Health is the leading specialist database dedicated to public health, completing the picture of international medical and health research by providing unmatched access to all the world's relevant public health research and practice.

introducing our new customised Global Health interface

Figure 1 Our new Global Health interface

key features of the new interface

Curated content: Our new Global Health homepage features a monthly focus on a key global health issue with selected news, articles and more.

News and alerts: Access regularly-updated international news when you log-in. Curated by our content specialists, with a number of topical news items written by our in-house editors - keeping you on top of public health developments from around the world.

Theme and Region pages: Browse and search focused records, book chapters, reviews and news across six key themes and 7 regions, making it easy to find the most relevant content to you.

Smart searches: Pre-defined searches, curated by our in-house content experts on key issues, themes or regions, keeping you up to date on relevant research topics at the click of a button.

Extended content: More than 3.1 million records, dedicated to public health, with full text hosted for over 100,000 articles including 375 CABI book chapters, over 160 reviews from CABI's very own e-journal CAB Reviews and over 500 news items from 2014 - 2018. New content added each week.

key facts for Global Health on all platforms
