Clinical Decision Support

Health care is a fast-paced field with high stakes. When your physicians, nurses, advanced care providers and allied health professionals have a question at the point of care, they need an answer they can trust, and they need it fast. EBSCO delivers.

Evidence-based resources help improve patient outcomes and quality of care.

DynaMed[®]

DynaMed is a cutting-edge, evidence-based clinical information resource designed to provide busy clinicians with the information they need, when, where and how they need it, supporting clinical decision making and improving patient outcomes.

Dynamic Health[™]

Dynamic Health is an innovative evidence-based resource that helps nurses and allied health professionals master critical skills. Users can find current, actionable information about core nursing competencies, transcultural care, patient training, occupational therapy, speech therapy, nutrition and dietetics, social work and so much more.

DynaMed Shared Decisions

DynaMed Shared Decisions offers a robust collection of tools to enable patients and providers to have meaningful and informed shared decision-making conversations leading to improved outcomes and higher patient satisfaction. The content covers a variety of specialties and is designed to be easily digestible for the patient.

Additional Resources Include: [Nutrition Reference Center[™]](#) | [Rehabilitation Reference Center[™]](#) | [Social Work Reference Center[™]](#)

Isabel

Isabel is used by physicians around the world to help construct or broaden a differential diagnosis. By entering the information normally captured in a patient workup, physicians are provided with a list of possible diagnoses to help them make an accurate final diagnosis quickly and easily at the point of care.

Nursing Reference Center[™] Plus

A nurse's time is a prized commodity, and in order to provide the best care possible, they need to quickly find the right answer to their clinical questions every time. Unmatched in scope, nurses turn to *Nursing Reference Center Plus* for all their practice, education and research needs.

Research Databases

The landscape of medicine is constantly changing, and your clinicians and researchers need to stay current with the latest clinical evidence from top-tier clinical literature.

Database content is curated and classified by experts in the medical field.

CINAHL® Complete

Support your nursing staff with *CINAHL Complete*, delivering fast and easy access to top full-text journals, evidence-based care sheets, quick lessons and more. It is compatible with EBSCO's point-of-care resources including *Nursing Reference Center Plus* and also allows nurses to earn valuable CEUs.

Global Health

The database from CABI covers all aspects of public health at both international and community levels, as well as a wealth of material from other biomedical and life science fields.

Health and Psychosocial Instruments (HaPI)

Produced by Behavioral Measurement Database Services, this bibliographic database is abstracted from hundreds of leading journals covering health and psychosocial sciences.

MEDLINE® Complete

Essential for doctors, nurses and health professionals, *MEDLINE Complete* is a full-text database that provides access to more than 2,200 top-tier biomedical and health journals, features MeSH (Medical Subject Headings) for more than 5,200 current biomedical journals and covers subjects pertinent to medical professionals engaged in clinical care, public health and health policy development.

APA PsycArticles®

Delve into the science of psychology and behavior with *APA PsycArticles*, the database of full-text peer-reviewed articles published by the APA and affiliated journals.

APA PsycBooks®

Significant in scope and depth, this database offers the most current and only comprehensive collection of full-text scholarly and professional books published by the APA and provides a pathway through the evolution of psychological thought.

Related Databases: [FSTA® - Food Science and Technology Abstracts](#) | [Mental Measurements Yearbook™ with Tests in Print International](#) | [PEP Archive](#) | [APA PsycExtra®](#) | [APA PsycInfo®](#) | [APA PsycTests®](#) | [Social Work Abstracts™](#)

E-Books and Journals

These resources are the perfect complement to EBSCO Health research databases and clinical decision support tools – providing users with the full spectrum of health care related content.

Enhance your collection with access to e-books, audiobooks, journals and magazines.

EBSCO eBooks™

Support the growing demand for electronic resources and give students and clinicians access to a wide variety of e-books on topics ranging from surgery, pediatrics, pharmacology, general practice and nursing, to administration, infectious diseases and more. Ask an EBSCO representative about the growing collection of DRM-free e-books that offer a flexible, easy-to-use experience with no sign-in required; no restrictions on printing, saving or downloading; and no limits on compatible devices or apps.

EBSCO Audiobooks™

Audiobooks continue to be the fastest growing segment of the publishing industry, and EBSCO is proud to offer healthcare professionals and clinicians access to more than 160,000 selections from popular authors such as Michelle Obama and Kamala Harris on key topics such as social justice, leadership, team building and more. Personal and professional growth is vital to success in the health care industry, and audiobooks allow busy professionals to gain a new perspective or delve deeper into an industry subset while multi-tasking and commuting.

Flipster® Digital Magazines

Digital magazine reading is on the rise, making it the perfect time to add popular magazines like *Prevention*, *Consumer Reports on Health*, *AARP* and more to your collection. It's easy to build a collection suited perfectly for your health care staff from a selection of more than 1,300 digital magazines including adult coloring books that clinicians will find relaxing, enjoyable and a welcome break from workplace stress.

GOBI® Library Solutions from EBSCO

GOBI is your online source for finding the latest medical, clinical, nursing and allied health print books and e-books, including Doody's Core Titles and Rittenhouse e-books. Choose from multiple e-book platforms and purchasing options, and benefit from duplication control across all formats and customized cataloging records. Let GOBI Library Solutions help your library deliver the books your users want in the format they need.

Journal Subscription Services

EBSCO provides subscription management services for e-journals, e-packages, and more. EBSCO maintains the most complete and accurate title file in the industry with more than 385,000 titles from more than 128,000 publishers worldwide. EBSCONET® Subscription Management simplifies each step of the subscription management process – title selection, ordering, e-access, activation, claims, renewals, and evaluation – all within a single platform.

Software as a Service

SaaS products for medical research are designed to bring together the best in content, technology and user experience to transform the way medical research gets done.

Streamline access. Save researchers time. Stop wasted effort.

Stacks Research Portals

Build a scalable and customizable single-point portal to make research more streamlined and intuitive. Stacks helps to increase usage of your medical library's content, cultivates collaboration within teams and allows you to create a specific user interface based on the department or team. And the best part? You can build, create and maintain it all on your own without IT.

EBSCO Discovery Service™ Health

Direct connection to the most relevant medical content is what matters most to researchers. *EBSCO Discovery Service Health* is an advanced discovery search platform that delivers the right content – every time, no matter where research is being conducted.

Code Ocean

Create, share, execute and publish computational code and data. Code Ocean provides an umbrella of tools for researchers to save time and do work in one place, while institutions can readily collect and preserve outputs and understand their impact.

OpenAthens

A partner of EBSCO Health, *OpenAthens* provides unrivaled single sign-on technology, simplifying access to your organization's electronic resources. With a single username and password, your users get access to all your subscribed resources, whenever they want and wherever they are. *OpenAthens* technology is based on SAML single sign-on standards which transmits user data in a very secure manner.

Perpetua

Long-term digital preservation and archiving for your research data, administrative records and special collections. Perpetua collects, preserves, safeguards and provides access to your data while meeting compliance and regulatory requirements.

protocols.io

Develop and organize research methods. With protocols.io, researchers collaboratively create, manage and share research methods, while institutions can collect the research methods, understand their impact and improve their discoverability.

EBSCO offers evidence-based solutions and tools that help improve patient outcomes.
