

NEJM Group fosters global connections. Our authors and readers form a worldwide community of practitioners, researchers, educators, health care leaders, and medical professionals. Together, we engage in substantive discourse that drives health care decisions every day, everywhere.

We ensure medical professionals:

- Have the information they need to improve health care quality and patient outcomes
- Keep current with recent research discoveries and promising new therapies
- Develop skills and knowledge for today's dynamic health care environment
- Implement practical solutions for health care delivery transformation
- Bring about health care policies that adapt to new medical, social, and political realities
- Increase learning efficiency and reinforce knowledge retention

Our mission is to advance medical knowledge from research to practice to ensure professionals have the information they need to improve health care quality and patient outcomes.

“NEJM Group is at the forefront of medical research and offers products that aim to help physicians throughout their career.”

– Academic Faculty, United Kingdom

KNOW

THE NEW ENGLAND JOURNAL OF MEDICINE

The *New England Journal of Medicine* (NEJM) is the most influential and trusted source for new medical knowledge and clinical best practices. Pioneering research articles and comprehensive reviews cover many specialty areas and are complemented with rich multimedia on NEJM.org, including clinical practice videos and interactive medical cases. Quick Take videos, audio interviews, and visual abstracts provide on-the-go learning options for readers on any device. A truly global brand, NEJM informs medical understanding and practice worldwide while driving efforts to improve health care delivery and patient outcomes.

NEJM.ORG

NEJM JOURNAL WATCH

The physician-editors of NEJM Journal Watch scan more than 250 medical journals across 12 specialties to provide the most critical and clinically relevant updates on the latest medical research. NEJM Journal Watch delivers timely information that physicians can trust, in a format that makes for an engaging, productive read. With succinct summaries and expert commentary, NEJM Journal Watch helps time-constrained clinicians expand their knowledge and provide better patient care. In addition, a daily alert, Physician's First Watch, recaps the most significant medical news in the last 24 hours.

JWATCH.ORG

NEJM 医学前沿

NEJM 医学前沿, or NEJM Frontiers in Medicine, is the authorized digital platform offering translated full-text content for the Chinese medical community. Each week, an expert team of Chinese physician-editors translates select content from NEJM and NEJM Journal Watch of importance to Chinese health care professionals, applying rigorous standards to ensure accuracy and quality control. Accompanying many of these articles is local commentary with additional context and analysis from China-based physician experts.

PREPARE

NEJM KNOWLEDGE+

NEJM Knowledge+ provides clinicians with an efficient and effective way to learn, improve their quality of practice, earn MOC and CME, and prepare for board exams. The smart adaptive engine at the core of NEJM Knowledge+ continually adjusts to create a personal learning experience. And with both desktop and mobile options, clinicians can learn wherever and whenever they like. NEJM Knowledge+ Pain Management and Opioids helps clinicians ensure they are up to date on current guidelines and clinical best practices while meeting their state's mandated CME requirements.

KNOWLEDGEPLUS.NEJM.ORG

NEJM RESIDENT 360

NEJM Resident 360 helps residents and students confidently navigate their training years and beyond, through a foundation of clinical knowledge and career insights. NEJM Resident 360 features Rotation Prep — expertly curated and distilled information covering internal medicine and pediatric rotation topics with succinct overviews, links to high-yield reviews and landmark trials, and procedure videos. In addition, NEJM Resident 360 offers podcasts, blog posts, and expert-moderated discussions that provide insight and guidance on issues related to resident life and career decisions.

LEAD

NEJM CATALYST

NEJM Catalyst launched in 2015 as a platform for executives, clinical leaders, and clinicians to share innovative ideas and practical applications for enhancing the value of health care delivery. Together with a network of advisors and thought leaders we launched a subscription-based, peer-reviewed journal *NEJM Catalyst Innovations in Care Delivery* in December 2019, which along with our live-streamed events, and qualified Insights Council provide real-life examples and actionable solutions to help organizations address the urgent challenges of health care.

CATALYST.NEJM.ORG

CME & MOC

NEJM Group offers a range of CME and MOC options. Authored by practicing clinicians, exams and questions cover a wide variety of medical topics and are available in print, online, and on mobile devices. Clinicians can assess their knowledge and address their learning gaps quickly and effectively.

ADVANCE

NEJM CAREERCENTER

When physicians are exploring the next step in their career — or recruiters are looking for the best candidates — they count on NEJM CareerCenter. Opportunities are listed in the recruitment section of NEJM U.S. print issues and at NEJMCareerCenter.org, where visitors can search for jobs by specialty and geography, share and apply for jobs, submit or search personal profiles, and sign up for automated job alerts. And with the NEJM CareerCenter app, jobseekers can get job alert notifications, search and view the latest openings, and submit applications right from their mobile device.

“I can find useful information to apply in my practice every day.”

– Clinical Leader, US

“I am convinced by my recent use of the NEJM Knowledge+ educational program in opioid use and pain management that this particular NEJM Group product is going to have a positive impact on this important challenge for our American society.”

– Physician, US

“I really like NEJM Catalyst and have found it to be a very useful source of health policy and delivery model change.”

– Academic Faculty, US
