

Let **TDNet Discover** navigate your research

A platform developed specifically for
biomedical libraries;
Includes everything you need to have in a
successful library discovery platform:

Discovery Search

A Fully Customizable Library Portal

Link Resolver

A Built-in Citation Matcher

Library E-resource Manager

Institutional Repository

Remote Access & Authentication

Focused Discovery Search

PAGE | 02

Massive Index Focused on Biomedical Content

A massive central index focused on biomedical content that retrieves targeted results

Quality score for each Article

Users see the attention each piece of research received across scholarly and non-scholarly resources.

Query Expansion

The Discovery Search utilizes thesauri and automatically expands the search to include related terms as well as account for language variations.

Personalization

Variety of features, such as automated articles suggestions and journal alerts provide users a truly personalized experience.

Content Independent Results

Best results are always shown first regardless of their source.

Scoped to your Collection

Choose whether to have the Discovery Search show results only from your subscribed resources or all results.

Have a Customizable Library Portal

Built on a full content Management System, everything within the portal is customizable.

Institutional Repositories

Create repositories that include content that is specific to your institution, such as internal documents, market reports and competitive intelligence analysis and combine them into the discovery search.

Library e-Resources Manager (A-Z List)

A quick and easy way for your users to see what journals, books and databases the library subscribes to. Print holdings can also be included.

Mobile Ready

The interface automatically adapts based on whatever device the user is utilizing without needing to install or manage apps.

Pre-packaged and Customizable Widgets

Our platform comes with specialized widgets, such as Discover Search box, External Search widget, the Library e-Resources Manager, Carousel and beyond that is a full realm of customizable widgets.

Unmatched Flexibility

You can create rules and permission sets, have specialized interfaces, build multiple document delivery workflows and much more.

Linking and Authentication

PAGE | 04

Best Link Resolver

We provide the deepest article level linking available on the market today. Our Link Resolver works with any citation database as well as TDNet discovery search

Remote Access & Authentication

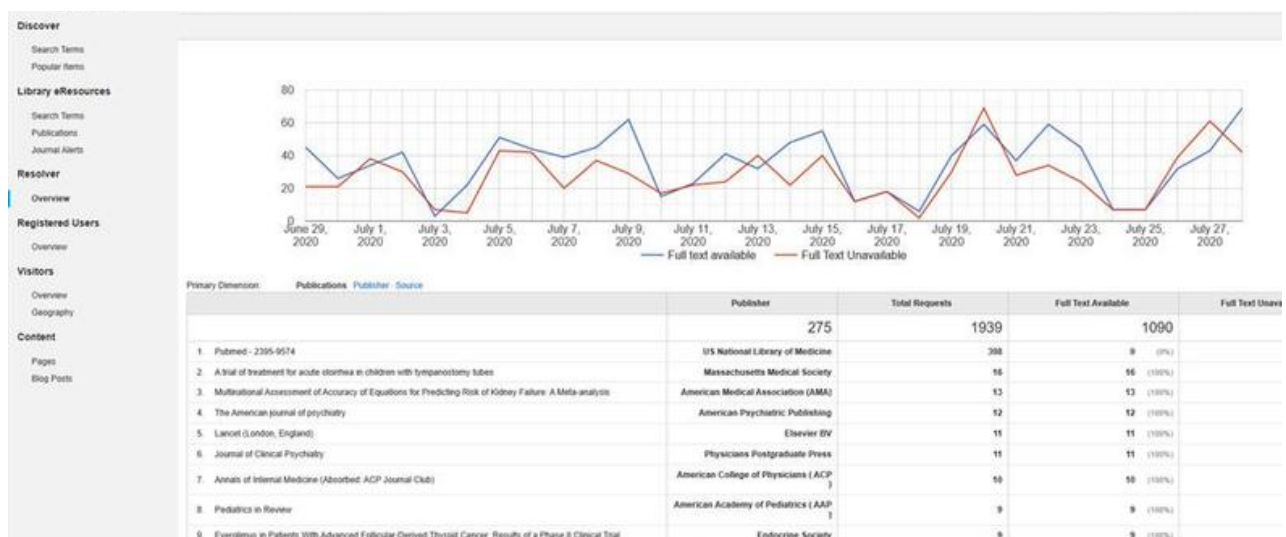

Through our partnership and deep integration with OpenAthens, we provide a seamless solution for remote access to your resources. We are also designed to integrate your local SAML based SSO.

Document Delivery

If you do not subscribe to a given article, our document delivery capability will automatically fill in the complete article citation information for easy submission.

Reports and Statistics

A full set of reporting tools showing usage broken down by article, publication, publisher and vendor, and a comprehensive suite of user behavior statistics that help you make the right purchasing decisions.

Customer Service

Responsiveness and Dedication

We take the approach that there is no issue or item too small for us to deal with. It's this level of support that sets us apart.

Knowing Your Needs

Unlike most companies, your sales representative is deeply involved in your implementation, and will ensure you have a successful one, that meets the needs of your staff and users.
