

Bourque Industrial Ltd.

Featuring state-of-the-art equipment, Bourque Industrial responds and delivers to a variety of markets. From fabrication through quality control and safety, we employ proven processes and technology to create lasting solutions to our client's fabrication requirements. With a proven track record in the fabrication and the repair or replacement of existing parts and equipment, we cater to a diverse clientele.

Bourque Industrial is a full service fabrication facility specializing in mid-size fabrication. With capabilities in localized marine fastenings, repairs, modifications and in house fabrication, we can assist a wide variety of customers to ensure that their targets are met with a high degree of confidence. Our customer base represents some of the largest companies in construction and manufacturing. Our location to a major Canadian seaport makes us ideal for supporting logistical operations.
