

Municipality of the District of Digby

Digby is the closest full-service port for new marine activity development taking place in the Bay of Fundy. Current economic development strategy is to position Digby to attract and assist developers with marine renewable energy projects in Bay of Fundy. (e.g. turbine refurbishment, overhaul, maintenance, assembly). SME, Nova Innovations, among others have quickly expounded on Digby's key strategic positioning. Smart Grid and utility scale battery storage are currently being tested. Digby is open for business.

Digby Port

- Provides Nova Scotia's only deep-water access to the Bay of Fundy and the trade and resource opportunities accessible through that remarkable marine portal
- Provides berthage and loading and unloading facilities
- Contains an independently operated marina that provides an 80-berth facility offering space and basic amenities to local and visiting recreational vessels.
- Largest NS ice free port on Bay of Fundy

Digby Economic Development

- Positioned to attract and assist developers with marine renewable energy projects in Bay of Fundy. Sustainable Marine Energy (SME) and Nova Innovations have successfully deployed in the waters off of Digby.
- Reparation and modernization of community port infrastructure

Digby Resources

- Fishing, forestry, tourism
- Renewables - a new area of focus, including marine, wind, biomass, biogas, solar and energy efficiency
