

# SutureSeal™

Seal. Protect. Heal.

## Wound Sealant

**SutureSeal™** is a long lasting, transparent bandage replacement made of a non-toxic biodegradable hydrogel. This is a specially formulated hydrogel designed for incision and wound protection in small and large animals.

**SutureSeal™** forms a protective layer that prevents dirt and debris from entering and lasts for up to two weeks post application.

**SutureSeal™** is sterile, colorless, odorless, flexible, water resistant, non-irritating and designed to enhance the healing process. The wound will heal, and the polymer will dissolve naturally after two weeks. Use on: staples, sutures, other wound closures and open wounds.

**Sealed for up to 14 days of Climbing, Flapping, Swimming, Digging, Jumping, Galloping**

SMALL ANIMAL

AQUATIC

EXOTIC

AVIAN

EQUINE
