

## HOSPITAL RESOURCES

### Dechra Veterinary Products

Dechra is 100% dedicated to veterinary hospitals, with many of our employees having worked in a hospital at some point. We understand how busy your day can be, thus we have created these resources for your hospital. Whether it's a quick reference chart for your treatment area or knowing you have access to a team of technical experts, we strive to make life easier for you and your team members, and to help you educate pet owners as their pets experience the many challenges of chronic diseases.

### HOSPITAL AND TEAM SUPPORT

- Technical brochures for in-depth review of diseases
- Diagnostic and treatment algorithms for complex and chronic diseases
- Promotional displays and programs to reward loyal clients
- Access to a team of trained veterinary professionals
- On-demand CE modules

### CLIENT SUPPORT

- Educational pamphlets on specific diseases
- Treatment Monitoring forms
- "How to" videos and brochures

# HOSPITAL AND TEAM SUPPORT

Your days can be fast and furious; algorithms, reference guides and technical brochures can make all the difference when you're in the heat of the day. We've been there. We understand.

We've tried to develop tools that will make a real difference to you and your team. We hope they will help everyone better understand the Dechra products you love, and help you learn about the Dechra products you are just getting to know.

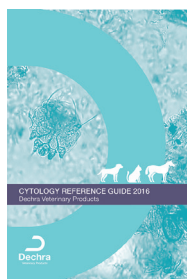

Here are a few examples of some in-clinic tools that we offer. See below for a list of commonly used items. Turn to page 4 to view the multiple ways you can access these great resources.

IV Infusion Rate & Volume Poster

### OPHTHALMOLOGY

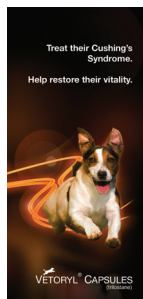

Ophthalmic Topic Briefs

Eye Anatomy Note Pads

# DECHRA CLIENT SUPPORT

Clients must play a vital role in the successful treatment of your patients for many different conditions. The proper use of medications and topical treatments will have a significant impact on the success of treatment. Successful and well-educated clients are happy clients and they will attribute much of that success back to you and your team. Educating clients in an environment where time is at a premium can be challenging, especially when it comes to complex disease states.

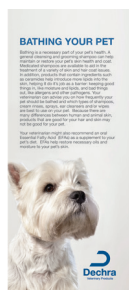

Here are a few examples of what we have developed for your use in the hospital with your clients. See below for a list of commonly used items. Turn to page 4 to view the multiple ways you can access these great resources.
