

[Radiation Oncology]

Is it right for your pet?

Learning your pet has cancer can be one of the most frightening things you ever hear. Take comfort in knowing that treatment options are available.

New advances in veterinary medicine like **stereotactic radiation (SRS/SRT)** are transforming the way we approach many forms of pet cancer — and it is now available in San Jose.

Radiation oncology in San Jose, including SRS/SRT, is available through PetCure Oncology, a national cancer care provider and the industry leader in SRS/SRT for pets. PetCure Oncology has treated more than 2,000 pets with cancer.

Dr. Lauren Quarterman
DVM, DACVR (RO)

Dr. Lauren Quarterman leads the PetCure Oncology team in San Jose, bringing her expertise in radiation oncology.

Dr. Quarterman earned her DVM at the University of Georgia in 2009 and completed a one-year small animal medical and surgical internship at VCA West Los Angeles Animal Hospital. She then completed a 2-year residency in radiation oncology at North Carolina State University and received her board certification in veterinary radiation oncology in 2012.

In her role, Dr. Quarterman remains focused on the continued advancements in the field of veterinary radiation oncology with a strong focus on improving quality of life.

What to Expect

You have been referred to PetCure Oncology because your veterinarian suspects or has diagnosed your pet with cancer and wants you to be in the very best hands. Let us guide you through the next steps:

- Schedule a consult with a board-certified radiation oncologist. To schedule an appointment with Dr. Lauren Quarterman at PetCure Oncology, call 408.385.3684.
- Just as in human medicine, the first step is to confirm the cancer diagnosis. If your veterinarian has confirmed that cancer is present, we will work together to ensure your pet receives the best care. You can send your medical records with diagnosis information, including:

Bloodwork • Biopsy • CT Scan • MRI • X-ray • Ultrasound

- With a clear understanding of your pet's cancer, we will partner with your veterinarian to provide the best treatment options available and help you make an informed decision.
- If you elect to move forward with treatment, your pet's first appointment can be scheduled right away.

PetCure Oncology — Revolutionizing Veterinary Cancer Care

Every pet is unique. Their treatment plan should reflect that. We will work with you to identify the ideal treatment plan for your pet, supporting their quality of life. After all, the goal of cancer care is to make your pet feel better — not worse.

Radiation Oncology

Radiation therapy options are nonsurgical and now include stereotactic radiation (SRS/SRT) in addition to conventional radiation therapy and palliative care. PetCure Oncology in San Jose is one of the few veterinary hospitals in the country that offers advanced SRS/SRT, a standard of care in human oncology that is relatively new to veterinary medicine.
