**ANTECH**

# Committed to veterinary success

**For more than 30 years, Antech has been a leader in providing high-quality diagnostic laboratory and imaging solutions.**

Our commitment to veterinarians and their teams is driven by a deep affection for animals and a desire to see them live longer, healthier lives.

These tools support preventive care-centered medicine that empowers veterinarians while ensuring their patients receive the highest degree of care.

Building upon extensive scientific inquiry and data analysis, we've developed new platforms to address the health conditions of veterinary patients through risk assessment, prediction, and diagnostics.

**ANTECH**

# Antech at a Glance

The diagnostic arm of  
**Mars Petcare**, the largest  
pet-care ecosystem in  
the world

More than **70**  
state-of-the-art  
reference  
laboratories

**90,000**  
samples  
processed daily

Nearly  
**16,000**  
veterinarians educated  
by the Academy of  
Veterinary Imaging

**2 billion**  
images stored

**150**  
board-certified  
veterinary specialists

# Our innovations drive the future of pet health

Antech brings together scientific rigor, medical expertise, and unparalleled access to pet health data to develop diagnostic solutions that increase pets' ability to thrive and free veterinarians to do what they do best.

**Groundbreaking, AI-driven predictive diagnostic platforms**

**Advances in molecular genetics for cancer detection and monitoring**

**Cutting-edge imaging product portfolio for small animals and equine**

**State-of-the-art reference laboratories**

# Board-certified consultants when you need them most

Sometimes it helps to get an expert opinion. We offer consultations with more than 150 board-certified specialists to help make sense of the most complex cases.

**Specialists in a dozen fields including radiology, internal medicine, and equine medicine**

**Real-time peer-to-peer consulting**

**24/7 customer service and quick turnaround times**

# **Elevating the industry through education and training**

Antech's team of professionals has extensive training, certification, expertise, and depth of knowledge to assist with everything from operational inquiries to advancing your diagnostic and imaging expertise.

## **Live wet labs**

**Coursework with board-certified instructors through the Academy of Veterinary Imaging**

**Hands-on ultrasound training with Scan-IQ**

**Residencies and clinical courses through AIS**

**Online video classes for ultrasound, system instrumentation, and telemedicine**

**Ongoing operational and technological support for veterinary practices**

# The Antech Family of Services

**Antech offers a comprehensive solution that supports veterinary practices by providing the tools, data, and training needed to deliver exceptional pet care.**

ANTECH • COMMITTED TO VETERINARY SUCCESS

# ANTECH

## Diagnostics

Antech's reference laboratories are home to advancements in molecular diagnostics, genomics, and artificial intelligence that are transforming the industry.

## Imaging

Our pioneering imaging solutions, including ultrasound, digital radiography, and the Academy of Veterinary Imaging, are the gold standard for equipment and education.

## Consulting

Medical consults add clarity and insight to test results and guide next steps with further diagnostics and therapies.

## Equine Medicine

We provide equine veterinarians with the only dedicated team of imaging and laboratory experts, and products offering diagnostic and therapeutic solutions for equine patients.

## Lab Practices

Quality assurance is a vital component of the way Antech works—and we pass along that expertise to our customers by reporting reliable results that they can trust every time.

## Education

From hands-on training in our wet labs to in-person and online presentations on our most popular products, Antech is invested in the success of veterinarians and their teams.
