

**Superb Image Quality.  
Easy to Learn and Use.  
Real-time Results.**

The Samsung HS40 presents unbelievable image quality and performance in an affordable, versatile box. This system is small enough to maneuver around any office, but powerful enough to scan even the most challenging cases. The HS40 is a great fit for any veterinary hospital that is serious about generating revenue with ultrasound.

### Features Include:

- 21.5-inch LED monitor
- 10.1-inch touch screen control
- Fully articulating monitor arm swivels, tilts, lifts in every direction
- Height-adjustable operating panel
- Pull-out keyboard (optional)
- Samsung Advanced Imaging Technologies (ClearVision™, S-Harmonic™, S-Flow™, Multivision)
- Two year warranty

# Comprehensive selection of transducers

Curved array transducers

## CA2-8AD

- Application: general purpose abdomen
- 68° FOV
- Frequency: 2 - 8MHz

## CF4-9

- Application: small animal abdomen, cardiac
- 92° FOV
- Frequency: 4 - 9MHz

Linear array transducer

## LA3-16AD

- Application: small parts, 38.4mm FOV
- Frequency: 3 - 16MHz

Phased array transducer

## PN2-4

- Application: abdomen, cardiac
- 90° FOV
- Frequency: 2 - 4MHz

## Packages starting under \$499 a month:

1 micro-convex (18 cm penetration )  
Dicom, Color Doppler  
2 year warranty  
1 day of in-house education

Education also available with one of our partner companies
