We make it easy to connect  
ezyVet to 120+ integrations.

## Robust Onboarding

Comprehensive change  
management process.

## Redefine Excellence

Exceed your patient and  
client care needs.

### Dean Aldrich

Veterinarian  
Flathead Pet Emergency,  
USA

“

Helping you focus  
on customer  
service and  
clinical excellence.

I have really enjoyed working with the people at ezyVet. Their customer service has been superior. Their software has helped us treat and track patients better. We've been able to reduce losses from missed charges and see what makes us money and what doesn't. It's made a huge difference in my IT stress. I would recommend this software to any clinic of any size.

”

# How it works

Improve every aspect of your veterinary practice with ezyVet's advanced tools and features.

### Medical Records

Drive the invoice in real time, no more missed charges.

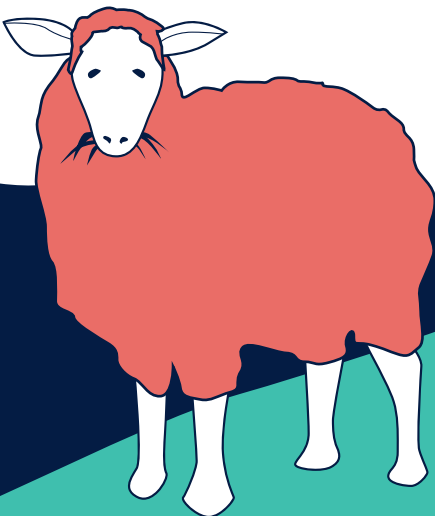

### Advanced Reporting

Finances, clinical history, appointments, stock and more.

### Client Communications

E-Mail, E-Faxing and 2-Way SMS using custom variable templates.

### Reminders

Pro-active reminder system for multiple triggers from appointments to products.

### Internal Memos

Instantly communicate with your team, using the internal memo tool.

### Self-check-in Kiosk

Streamlines the check-in process.

### Customer Portal

Brings client experience to the forefront of your hospital.

### Central Structure

Link multiple practices and oversee business operations.

### Templates

Comprehensive template systems utilising pick lists and shorthand.

### Wellness Module

Configure plans, sign up patients and let ezyVet do the tracking.

### Tagging

Generate targeted lists for reporting and marketing purposes.

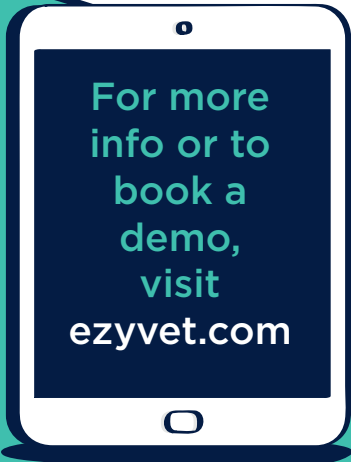

### Records Dashboard

Search function lets you filter information for desired results.

### Stock

Automatically track stock and generate orders.

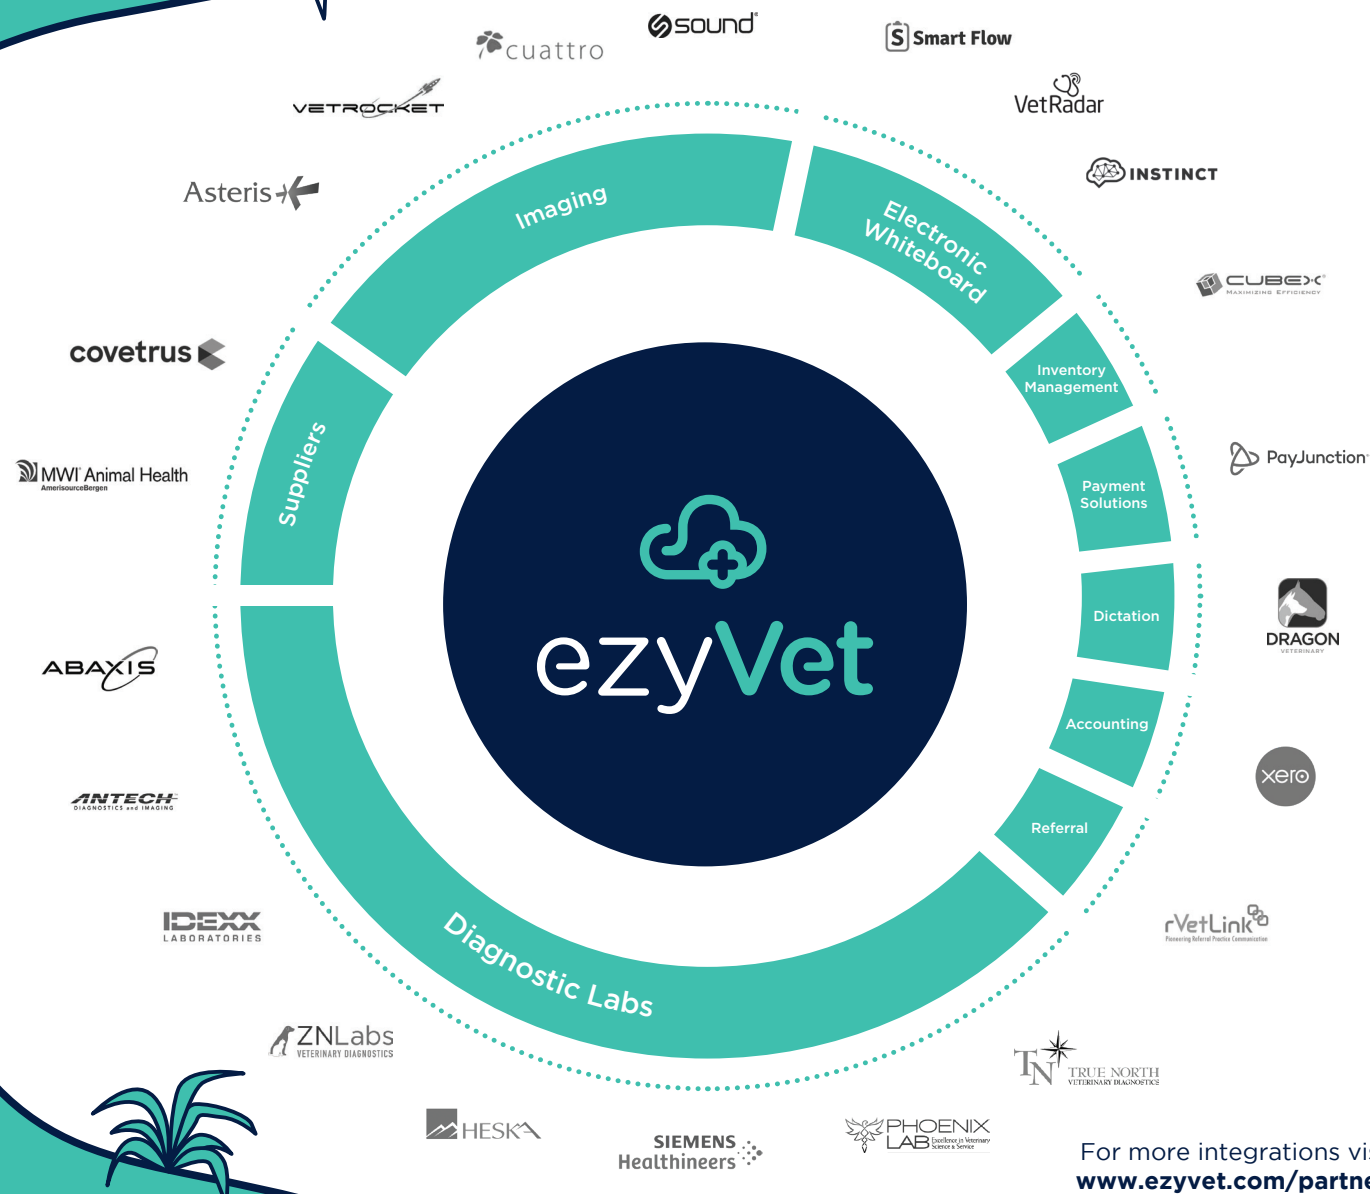

# Connect ezyVet to the rest of your practice

We make it easy to connect ezyVet to 120+ integrations, tools and software that you use every day.

Everything you need to streamline workflows and run your practice to its full potential.

Our customers can also connect their data and build off our open API.

For more integrations visit  
[www.ezyvet.com/partners](http://www.ezyvet.com/partners)

# Data and security

We take data and security seriously at ezyVet and partner with the best when it comes to protecting your organisation.

## Data security

Designed with bank level security, all data is sent over the internet encrypted with RSA and SSL technology.

## Data hosting and storage

ezyVet services and data are hosted in Amazon Web Services (AWS) giving you automated backups of your data.

Hospital Administrator  
Animal Clinic Northview, USA

“

The Implementation team we had from our go live date were AMAZING! The support staff have been supportive. Everyone we have encountered has extended a supportive hand to help and in the nicest way possible. That alone makes working with the ezyVet team a dream! Thank you to all of you for all you do and your hard work.

”

“

I really like the way that we can each set up ezyVet the way we would like it and still fit in with the way I like the clinic to run. I also like that there is a place for every bit of information you would like and it is easy to find and summarize later. I like the interaction with the support staff, they show you how to do something and then you can work it out and the knowledge stays with you.

Practice Owner  
Kingman Animal Hospital, USA

“

I loved the ease of the training and how fast we all learned the system. This is our 3rd software change in 20 years and I am happy to say that the transition was by far the best! The training was key! We are more efficient in everything we do. We all love that this is cloudbased so we can easily take it on the road as well as finish up charts at home if needed. We have really enjoyed the software and feel its just only going to get better.
