

Animal Memorial Service

We at Animal Memorial Service (AMS) would like to extend our deepest sympathy over the loss of your beloved pet and family member. We have partnered with your veterinarian to provide the best possible options and services for afterlife care to honor your pet. We are committed to providing these services in a compassionate and respectful manner to make this difficult time as painless as possible.

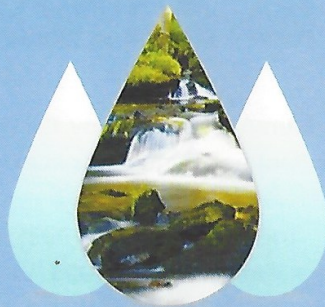

Animal Memorial Service is a family owned company based in Gilroy, California. Together with veterinary hospitals across Northern California, AMS is able to provide the best afterlife care options to grieving pet owners.

AMS offers both individual and communal options. For those clients that wish their pet's ashes returned; AMS has a Water Based Cremation option as well as the traditional Fire Based cremation. Water Based Cremation is a gentle "green" cremation method that is similar to Mother Nature's own.

Animal Memorial Service (AMS) is proud to be the first pet cremation facility in Northern California to provide the revolutionary technology of Alkaline Hydrolysis, or Water Based Cremation. This gentle, cremation method is an established and successful cutting edge technology that provides numerous environmental benefits in comparison to traditional cremation.

For a completely green cremation process we offer a biodegradable urn for your pet.

By selecting an individual cremation (whether traditional or Water Based) you can feel confident that you are receiving only your pet's ashes. We identify each pet at the veterinary hospital through a sophisticated barcode technology that is also unique to AMS. That barcode is then used to track each pet through our process to ensure 100% accuracy.

AMS and your local veterinary hospital have collaborated to make this painful process as simple as possible for our grieving clients. Your clinic has already chosen a beautiful urn to return your pet's remains, yet AMS will provide customization should you choose to personalize your pet's urn.

Your pet's remains will be returned to you in the standard urn (shown below) with a laser engraved name plaque.

There are many ways to individually personalize your pet's urn. Our website allows client's to select different options for their pet's memorial and has a product catalog to allow you to upgrade your pet's plaque or memorial.

Please feel free to consult with our team to create something beautiful and memorable to honor your beloved companion.
