**Hosted & Managed  
Access Control  
Structured Cable**

Since 2006 SMS Building Systems has been providing state of the art solutions for video surveillance, asset protection and security, access control and structured cabling. We offer a range of services from design and installation to central station monitoring as well as hosted and managed services for access control. RCDD's are on staff to assist in cable infrastructure design to provide a complete 21st century solution.

You can trust that we are one of the top access control and security companies in Southern New Jersey. Our process is simple yet essential to your protection. We listen first and ask a lot of questions to ensure that we understand your objectives. We then research, design and engineer to your specifications a system that protects against armed threats; keeping safe your personnel and those they serve.

# Access Control

**Exceptional access control for your building security needs!**

## Cloud Based Access Solutions

SMS Building Systems specializes in installing cloud based access control security solutions and also cloud based video surveillance systems. We pride ourselves on integrating superior quality access control equipment. Plus, choosing us to implement your cloud based access control system will afford you low ownership costs, which is great! Other benefits in working with us include your getting to manage your cloud based system the way you want with ease. And after the install, we provide you instruction that gives you control from the cloud, from anywhere, and on any device. Due to our years of experience, you can count on us to handle your set-up with ease and without hassle. Call us today to speak with an expert and we will answer your questions and provide a no-obligation quote.

## Traditional Access Control Systems

Know that we also offer traditional access control systems with a dedicated server. One benefit of having a dedicated server is that you would not have the recurring cloud hosting fees that come with a cloud based access control system. While most new access control installs are cloud based due to a variety of features unavailable in traditional access control systems, still some people choose the traditional route since it is kept entirely in-house and comes with a one-time project fee cost. It is for this reason that SMS Building Systems provides both options. Together we will evaluate your specific needs and come up with the access control system that is most appropriate for you.

## Trustworthy. Reasonably Priced. Expert Installations

You Are Going to Love Working With SMS Building Systems! Our people are experts in the field and passionate about what they do. Everyone from our support staff to our project managers and installers, understands that our work is crucial toward building customer loyalty and retention. Our service does not stop with the completion of the access control system installation. Each of our experienced team members take time to understand our clients, and most of all, they pride themselves in producing a project install plan that best fit each clients timeframe and requirements.

## Next Step: Schedule a Site Visit

The next step will be to coordinate the best date and time for one of our SMS Building Systems estimators to visit your commercial property for a free evaluation. During the visit, our evaluation expert will arrive on the property, discuss what you are looking to do. Our estimators will also be happy to arrange a visit with the property owner or manager and work through the information collection process and brainstorming together. Once the evaluation is complete, we will quickly follow up with our estimate made up of a diagram and an itemized list for each necessary component of the job.

**Ultimately no matter what access control solution your business requires, we are able to provide the right solution for you. Call us to get started.**

# Structured Cabling

## Structured Cabling Contractor in New Jersey and PA

### Cat6 & Cat6A Cabling Installer in NJ & PA

SMS Building Systems specializes in installing Cat6 and Cat6a cabling. An appropriately designed and installed cable plant is vital to keeping your network and business running as smoothly as possible. We pride ourselves on being one of the very best NJ Cat6 installers and we use only industry brand known wire and jacks. If you have an IT department, our installer team will work with them to be certain any and all specifications are met for your building/office. Due to our years of experience, you can count on us to handle your Cat6 installation with ease and without hassle. Our company has a consistent record of satisfying our clients with high quality and smooth performing network solutions. Call us today to speak with an expert and we will answer your questions and provide a no-obligation quote.

### Network Cabling Services in New Jersey and PA

Your network is only as good as its foundation. A sound network infrastructure is essential to a reliable network. When you hire SMS Building Systems for your company's network cabling needs, you can rest easy, because you will be getting the absolute best cabling installers. Whether it's Cat 5e, Cat 6, Cat 6A or fiber optics our team of technicians will complete a thorough assessment of your existing network—or, if you are starting from zero, evaluate your networking requirements—we will provide you a detailed quote for your data cabling install.

The overall performance of your company hinges on having a dependable IT infrastructure. Network wiring plays a critical role in that performance. SMS Building Systems has proudly been in the network cabling and wiring industry for years. Our network cabling services are intended to help make your network run smoothly and dependably. No matter how big or small the work required, or the intricacy of your network wiring requirements, our installers of copper and fiber cabling are here to assist. To start a conversation about your network cabling installation needs, call 856-520-8769. Our Hubbell certified cabling installers are focused on getting your data cabling work done fast and will meet all building standards and best practices.

### Network Infrastructure Services

Irrespective of whether your office has just a few or a few hundred computers, it is essential to make sure you are able to connect them in order to operate across a dependable network. With the network infrastructure services offered by SMS Building Systems, you can bring up-to-date all interaction between users and networks. By providing network infrastructure solutions for your company, we help you modernize your network so that you can optimize the day-to-day operations of your business. Whatever type of network infrastructure services you need, the network infrastructure pros at SMS Building Systems provides you with the perfect solution and to match your company's communication requirements. If you are looking for your structured cabling solutions, look no further than SMS Building Systems.
