See the OP difference

Pediatric-specific solutions designed by pediatricians for pediatricians

IMMUNIZATIONS

Creates a recall list of patients overdue for an immunization

Issues alerts for overdue vaccinations

Provides patient-specific vaccine forecasting visible to the front desk and clinicians

Alerts users if a vaccine is ordered, but not indicated in the immunization forecast

Consists of up-to-date ACIP immunization forecasting and recall capabilities

Streamlines inventory and administration of VFC & private lots with 2D barcode scanning

Includes interoperability with state immunization registries, as well as regional and national labs

GROWTH CHARTS

Includes AAP recommended WHO/CDC hybrid growth charts

Provides Down Syndrome and preemie growth curves

Measures abnormal vitals based on Harriett Lane guidelines

Allows measurements and charts to be printed on one page or delivered directly to the portal

Converts English and metric measurements with percentiles

TEMPLATES & CUSTOMIZATION

Integrates AAP Bright Futures™ templates, surveys, education & developmental milestones

Has over 200 preloaded and fully customizable pediatric-specific sick visit templates

Allows the combination and customization of templates as well as multiple diagnoses

Automatically applies the -25 modifier when documenting a sick visit during a well visit

Creates school and camp forms from patient data with one touch

Includes over 30 pediatric-specific surveys including M-CHAT, Vanderbilt and CHADIS integration

e-PRESCRIBING

Easily converts weight-based dosing based on patient's most recent weight

Adapts for practice and provider-specific favorites list

Provides patient-specific interactions as well as formulary details

Includes electronic Prescribing of Controlled Substances (EPCS)

Allows for electronic Prior Authorization (ePA)

BILLING

Provides real-time eligibility through multiple integrated clearinghouse partners

Codes vaccine administration charges automatically to payer-specific requirements

Allows for the ability to run detailed patient and family credit reports

Creates billing statements at a family or patient level

Includes dynamic dashboard to track and update A/R in real time

Offers U.S. based billing team with 98.8% first-time acceptance rates

Maintains an average of 15 days to insurance pay through OP RCM

FAMILY FRIENDLY FEATURES

Defines financial, social and genetic families individually to support complex family structures

Ability to transfer patient balances and credits among financial families

Updates to contact information for one family member auto-populates for all family members

Links family history to genetic parents for all siblings

Allows for unlimited contact entries to support any family scenario

Ability to set individual elements of a chart as private at several levels

Limits parent access to records on the portal that have been marked as confidential

REPORTING

Includes integrated well visit recalls based on the AAP Periodicity Schedule

Customizes demographic recalls to meet your practice's specific needs

Offers preloaded Pediatric Care Plans with item-specific recall capabilities

Provides instant quality reporting metrics for Meaningful Use and PCMH

Has detailed access to all database fields and tables for any reporting need

Allows for customizable and automated SQL reports

PATIENT PORTAL *Parental Features*

Register new patients and update patient demographics

Obtain and print medical information including immunization record and lab results

Request and print school, camp, sport and physical forms

Access to visit history and educational handouts

Schedule flu clinic appointments and complete surveys prior to office visit

Message parents and office in real-time, secure, bidirectional format

Pay balance and view billing statements online
