# Autism Treatment For The Modern Family

Elmy Therapy is a tech-forward provider of in-home and online Applied Behavior Analysis (ABA) Therapy. Our Mission is to provide highly personalized care in the environments best suited to help children with unique needs grow and thrive. We strongly believe that mental diversity does not need a magic pill or miracle cure. Rather, we must all work together to find strategies to embrace it. We are honored to serve you, your family, and your child.

## Transformational Outcomes

We collaborate with your family to set actionable, attainable goals. Our data-driven therapists log and track daily behaviors to keep you updated on progress over time.

On average, our families see an 85% reduction in problem behaviors and a 13% increase in communication skills within the first 6 months of care.

## Why We're Different

### + Personalized care for your child

There's no one-size-fits all approach to autism care; each care plan is tailored to your child's unique needs.

### + Collaboration with your family

Your child is at the center of our care — and so are you. That's why we make you and your family an important part of the treatment process.

### + Technology-powered care

Our advanced technology makes it easier to get care for your child, and allows our clinicians to track every milestone, moment, and celebration — all in one place.

## Insurance, Handled

Let us do the heavy lifting. From obtaining authorization to troubleshooting coverage, we have experience navigating over 200 plans including Medicaid.

Here are just a few of our insurance providers
