

ABOUT PEDIATRIC ASSOCIATES

PEDIATRIC ASSOCIATES

Since we opened our first office in 1955, Pediatric Associates has grown into the nation's largest privately-owned pediatric practice, caring for generations of residents throughout Florida.

Pediatric Associates offers the most extensive office hours of any private practice in South Florida, accomodating working parents with extended evening and weekend office hours.

WHAT PARENTS ARE SAYING

"My family has been going to Pediatric Associates for decades. Our doctor has seen us through some very tough times as my son has a very serious chronic illness. There were times we didn't know if he would make it, but he is going to turn 18 soon and we have Pediatric Associates to thank for it." – T. MALIN

"We've been bringing our child to Pediatric Associates for 14 years. I find it so comforting to have some of the same staff caring for my son since the very beginning!" – K. WOODS

FOR EXPECTANT PARENTS

Congratulations on your new additon(s)! We firmly recommend that all parents/caregivers should receive the Tdap vaccine before the baby arrives or in the hospital.

Below are the steps to take once you and your baby have been discharged from the hospital:

- Contact the Pediatric Associates office you have chosen and schedule your first office visit. The visit should occur 24 to 48 hours after the baby's hospital discharge (you can call while still in the hospital).
- Add your newborn to your insurance plan and select a primary care physician within the first 30 days of life. Our office staff is trained to assist you with information regarding this process.
- We will make every attempt to schedule your first office visit to your stated preference, however, we strongly recommend the first appointment of our morning or afternoon session. This will minimize your baby's exposure to the public and potentially crowded areas.
- **Please bring the following to your appointment: your insurance card, driver's license or picture ID and the baby's discharge information (discharge summary, hearing screen certificate and immunization record if Hepatitis B vaccine was given in the hospital).**
