

Visit the Pediatric Nutrition Learning Center

Expert opinions and evidence-based guidance from highly regarded faculty on the entire spectrum of topics related to healthy infant and child nutrition, with a focus on the critical first 1,000 days of life.

Find activities and resources related to a wide range of issues of nutritional concern, including allergies, gut microbiota, functional gastrointestinal disorders, formula selection, complementary feeding, and key nutrients for optimal development. Programs and resources are available in a variety of lengths and formats for self-paced education.

INTENDED AUDIENCE

Pediatricians, family practitioners (MD/DOs), nurses, nurse practitioners, physician assistants, dietitians, and other clinicians with an interest in optimal nutrition for infants and young children.
