

An end-to-end software application for delivering POC services at scale

- *No downloads or time-consuming implementation*
- *Support for integration with your existing software*
- *No upfront fees or commitments*
- *Patient access to a verifiable record they can share to protect public health*

Appointment scheduling and automated reminders

- Appointment scheduling
- Custom clinical intake forms
- Patient reminders to schedule subsequent vaccine doses

Easily support to community organizations with large scale testing and vaccination programs

- Support local long-term care facilities and other organizations
- Employer dashboard to assist managers with COVID testing and vaccination protocols

Track specimens and upload/send test results automatically

- Manage collections with bar-coding
- Integrate lab equipment to reduce errors and data entry

Compliance support

- Retain an electronic record of manufacturer, NDC#, lot# and expiration date for each episode of care
- Training documentation/competencies
- Incident reports and public health reporting
- Inventory tracking

Clinical follow-up

- Clinical follow-up solution
- Patient counseling notes
- Supplemental testing documentation
- Referral notes, etc.

Streamline and automate custom intake process

- Customized test and vaccine information and consent.
- Collect what you need online to limit contact and streamline delivery

Give patients a verifiable record they can share with confidence

- Designed to insure the authenticity of your patients' information
- Dragonfly guarantees the data on our platform is authentic and unchanged.
- Secure patient portal for records of all test results and services for ready access and sharing

PRIVATE. PORTABLE. PROVABLE.
