

ROMANIT® Natural Limewash Pure Slaked Limewash for an Old-World Look and Feel

KEIM understands lime wash more than most, having been producing them since 1878. Lime has been used for centuries and are 100% natural giving your paint projects an authentic old-world aesthetic unmatched in modern acrylic paints. Romanit is ideal for historic restoration and preservation and meets or exceeds all requirements of local, state and federal agencies. The unique combination of vapor permeability, low surface tension during drying and curing and the reversible nature of lime makes Romanit perfect for delicate historic surfaces, both indoors and outside.

NATURAL SLAKED LIMEWASH FOR PRESERVATION AND NEW CONSTRUCTION

And Romanit is produced in a controlled environment for quality and batch-to-batch consistency not found in field-mixed lime paints. Colors are vibrant and true and will never yellow or lose intensity. Lime is a softer finish, however and will gently age to provide a time-worn patina in just years outdoors. Apply as an opaque paint finish, distress for a more antiqued look or thin to create a washed or stained appearance.

WHERE TO USE:

- Historic Restoration—the look and feel of authentic limewash is incomparable in modern finishes. Calcification of lime binder fortifies and strengthens historic stucco and masonry surfaces.
- Interiors--where a unique, old-world or mottled finish is desired with a suede-like feel. No need for primer over new or old plaster walls.
- Healthy living--for those with chemical sensitivities and allergies—no allergy triggers
- Modern Masonry Exteriors—when authentic limewash appearance is desired—easy to create distressed finishes.
- Porous Surfaces—Romanit must penetrate stucco, masonry or plaster. Primer must be used on previously painted surfaces.

ROMANIT DELIVERS UNIQUE BENEFITS

- Natural slaked lime—when only pure lime will do, Romanit uses only aged lime for added quality and control of colors
- Reversible for preservation—lime finishes are reversible within the first five days and ideal for extremely delicate surfaces
- Beautiful color options—mineral colors are rich, vibrant and won't fade and the lime binder ensures whites won't amber or yellow over time
- Old World Appearance—both historic and new masonry benefit from the mottled appearance and patina of pure lime
- Safe--Class A Building Material won't burn and in case of fire will not contribute fuel or noxious smoke
- Vapor Permeable—limewash is extremely vapor permeable and will allow moisture to freely escape without damage to the finish
