

RAW

Introducing Genelec RAW. Exceptional sounding, aesthetically beautiful loudspeakers that are kinder to the planet.

GENELEC® | RAW

Flawless sound, stunning looks.

All RAW models feature our timeless Minimum Diffraction Enclosure (MDE) design, developed in close collaboration with leading industrial designer Harri Koskinen. The curved form of its slimline enclosure delivers incredibly flat frequency response, precise imaging and unparalleled acoustical performance. With flawless sound and stunning looks, RAW has it all.

Studio, AV or Home. RAW is for everyone.

The natural finish of RAW models requires no painting and less finishing material. This creates an even more environmentally friendly loudspeaker that allows the pure beauty of the enclosure's recycled aluminium to shine through – and makes every speaker unique. The RAW range features some of our best loved two-way designs for studio, AV and home applications.

Audio Engineering Society

Choose RAW. Support the AES.

To support the Audio Engineering Society throughout the current COVID-19 crisis, we'll be donating a percentage of every RAW speaker sold to the Society's fundraising initiative – helping this much-loved organisation continue its valuable work. Click [here](#) for more information.
