

Automated, Flexible, Enterprise-Wide Control

AssurX Change Management software orchestrates, tracks and documents changes across all functional areas of an organization. Initiate and process any change type as required for compliance and risk minimization through best practices workflows.

A major factor impacting the effectiveness of any quality and compliance program is the role change management plays in the process. An automated change control solution provides a compliant method that will help your organization facilitate and control any type of change.

AssurX Change Management is designed to enable cross-functional engagement and provides visibility of tasks, assessments and timelines. A streamlined workflow to manage and facilitate tasks and deliverables towards achieving the desired outcomes for product or process improvement.

COLLABORATION AND CONTINUOUS IMPROVEMENT

Incorporate an automated change management process to promote a robust and sustainable change and improvement cadence.

Utilize AssurX Change Management to centralize activities for collaboration, review and approvals from designated subject matter experts (SMEs). Obtain and track necessary feedback on the effectiveness of proposed change plans. Monitor the progress of each change to ensure proper planning, prioritization and communication for deliverables and effective implementation and rollout.

CONFIGURABILITY

Manage any type of change across all functional areas of your business process. With AssurX's low code configuration model, make unlimited workflows and field level modifications with point-and-click tools.

AssurX's configurable processes integrate seamlessly with the entire suite of solutions to provide a single, all-in-one solution for managing quality and compliance enterprise wide.

AUTOMATIC ESCALATION

Automated escalation rules, notifications and email alerts keep the change process moving through active communication. Transparently monitor progress and prevent issues and tasks from falling through the cracks.

ENTERPRISE SYSTEM INTEGRATION

AssurX is designed to easily integrate with external business systems like ERP, PLM, CRM, LIMS and other enterprise applications.

Change requests triggered from any source can be immediately captured and put into action.

BENEFITS OF AUTOMATING CHANGE MANAGEMENT

- + Increases accountability through tasks, process approvals, and automated audit trails
- + All change controls are initiated, tracked and managed to ensure compliance requirements and product specifications are met
- + Integrate with relevant QMS processes including complaint management, nonconformance and deviation management, CAPA and supplier management for a robust, efficient system
- + Demonstrate compliance with regulatory requirements and standards including FDA, ISO, GxP, NERC and other industry regulations with a closed-loop change control
- + Workflows enable collaboration for tracking regulatory filing and approvals and quality management processes that must be performed in alignment with the change request
- + Connect to documents, configuration files, nonconformance reports, supplier records, design controls or any other interdependent digital records for greater visibility

ASSURX CHANGE MANAGEMENT: KEY FEATURES

- + Fully configurable; unlimited workflows
- + Time-stamped audit trails for change history
- + 21 CFR Part 11-compliant electronic signatures
- + Configurable dashboards for quick insight into the state of all open change tasks
- + Escalations rules for critical tasks
- + Seamless integration with other AssurX quality solutions, business, and regulatory systems
