

Easy to use, comprehensive, and actionable

Unparalleled ability to forecast and impact outcomes

Top Features

- 1 DURATION:** Target, benchmark, and export return-to-work guidelines by diagnosis or at the claim level, securing an early release to work with appropriate job modifications
- 2 TREATMENT:** Evidence-based, up to date clinical summaries with medical necessity guidance, patient selection criteria, and citations into medical literature
- 3 TAO / UR Advisor:** Auto-authorization of evidence-based care with frequency and number of visits plus return-to-work scores by medical intervention
- 4 Risk Assessment Score:** Resource optimization and interventional triage with real-time claim risk assessment
- 5 Drug Formulary:** Coverage clarity, patient guidance, and NDC coding for pharmaceuticals with opioid alerts and MED Calculator
- 6 Cost Modeling:** Benchmarking, reserving, MSAs, and savings reports by diagnosis or at the claim level
- 7 Patient Education:** Reliable, relevant, bilingual patient education, images and videos for shared decision-making from trusted resources like Medline Connect

Customer Feedback

"I am a huge advocate of ODG, and now a Certified Reviewer. I have used the evidence-based medicine approach of ODG in the last three years of my claims management career and I have reduced claims costs 42-56%. Thank you for your work and the amazing applicability of research and organization of the science! I have been a National Claims Manager for 23 years. As an employer advocate, I work to educate the large self-insured employers on the applicability of the guidelines. I know your work is going to transform the industry. I am thrilled about it! THANK YOU!!!"

Tammy Martin, CWCL

"This (SB 878 ODG adoption) is a fine piece of legislation. It will help us not only retain jobs, but attract new industries while protecting the injured worker."

- Oklahoma Governor Mary Fallin

Welcome to the future of healthcare delivery

The TAO Index:

Modeled from approximately five million medical claims, the TAO Index is the Yin to evidence-based medicine's Yang, working in concert to optimize health and financial outcomes by reducing friction, treatment delay, and managed care costs. TAO puts claims payers, healthcare providers, and managed care companies in the position to expedite improved patient outcomes and deliver quality care with minimal waste.

Treatment Analyzer on Outcomes (TAO)
Formerly the UR Advisor

Easy to Forecast, Easy to Impact:

The web interface for leveraging the ODG evidence-based treatment and return-to-work guidelines is designed to make it easy for case managers, claims adjusters, and healthcare providers to tackle the industry's most important challenges including timely return-to-work, medical management, reserving, risk assessment, and interventional triage.

Return-to-Work = Return-to-Health:

Not only does ODG help patients get the appropriate treatment with minimal delay, but our ODG Drug Formulary and MED calculator give clear, evidence-based prescribing information for all drugs used in the workers' compensation setting. This can help reduce inappropriate prescribing practices and potential opioid addiction.
