

Diagnostics & Life Science Services

Ximedica offers a variety of solutions in all areas of product development, customized automation, and contract manufacturing. Our diverse services allow you to take your product from first concept to an expedited market launch. Unparalleled solutions at every step of the product lifecycle.

Product Development

We eliminate the cost, time, and complications involved with using multiple suppliers.

Our expert team at Ximedica has extensive experience with system-level architecture, the critical technology within diagnostic instruments and their applications. Our vertically integrated process combined with strong project management ensures that we exceed quality and time-to-market expectations.

Our breadth of expertise includes:

- In Vitro Diagnostics
- Life Science Instrumentation
- Optics
- Fluids/Microfluidics
- Robotics & Automation
- [Disposable Design](#)
- Mechanical Engineering
- Industrial Design
- Software & Firmware
- Electronics
- FEA & CFD Analysis

Contract Manufacturing

Turnkey manufacturing solutions specializing in complex instrument assembly.

Our robust, tried and tested [Quality Management System](#) allows our team to produce products with lowered risk and controlled cost. We can ensure quality and accelerate time-to-market by manufacturing under our own roof in Los Gatos, California, or at our [FDA registered facility in Providence, RI](#).

ximedica®

Ximedica is a full-service ISO 13485-certified and FDA-registered product development firm. For 30 years Ximedica has provided a unique growth platform enabling organizations to successfully deploy medical technology products into the market. Its headquarters are in Providence with offices in Hong Kong, Minneapolis, San Francisco and Silicon Valley.
