Jordco products are available through your dental supply dealer
and now online at www.jordco.com

One Tough Foam...

New Squared Seating Tip

Jordco's e-Foam® Rotary HD inserts are specially designed for
cleaning most rotary shaping instruments. A rotating file secured in a
hand piece can be placed directly into the high density foam to assist
in cleaning debris from rotary flutes. Our Rotary HD foam minimizes
tearing or shearing of the foam while a file is in motion.
Precisely engineered to fit Jordco's Endoring organizers.
Jordco e-Foam Rotary HD, endodontic foam inserts,
REF: ERFBD-s (48 high density blue inserts)

E-FOAM ROTARY HD FREE SAMPLE

Discover for yourself how well our new e-Foam Rotary HD holds up to rotary files.

E-Dx®

The next generation in endodontic diagnostics. Cold and fracture test multiple teeth in a controlled and simple manner. One instrument, two useful applications. REF: EDX-s (kit); EDXRP-s (refill pack)

Simply spray a dental coolant with the nozzle closely pointed to the foam to chill the instrument.

Check for fractured teeth by using the FracTester™ located at the end of the handle. Patient's bite response determines tooth integrity.

FEATURES	BENEFITS
Dual Diagnostic Instrument	Single instrument that cold and fracture tests teeth
Contra Angled Pliers	Contra angled design reaches posterior teeth and improves visibility
FracTester™ Handle	FracTester's pyramidal bite feature is placed onto cusps tips or other suspect areas to help detect fractures
Single Use Pliers & Foam	Reduce cross contamination

JORDCO® E-FOAM® & E-FOAM® ROTARY HD

The endodontic foam that set the industry standard is now available in original and high density. Original e-Foam still provides the high quality, autoclavable foam you've grown to trust while the new Rotary HD version adds more durability for use with rotary instruments.

NEW E-FOAM ROTARY HD INSERTS
Specifically designed for rotary files

TRIED & TRUE YELLOW & BLUE BY JORDCO™

Jordco e-Foam Combo Pack (ERF-s): 24 blue and 24 yellow inserts; Jordco e-Foam Blue Pack (ERFB-s): 48 inserts; Jordco e-Foam Yellow Pack (ERFY-s): 48 inserts; Jordco e-Foam Rotary HD Blue Pack (ERFBHD-s): 48 inserts

FEATURES	BENEFITS
Single Use Foam	Reduces cross contamination
Open Cell Foam	Preloaded instruments can be steam autoclaved prior to use
Faceted Foam	Allows organization of instrument setups

ENDORING® II COLOR EDITIONS

3 COLORS OFFER ORGANIZING OPTIONS

Shown without metal ruler

The ENDORING II organizer is available in three distinctive colors that add the dimension of color coding to instrument set-ups (Yellow, Green, Violet). Color editions are available with or without a metal ruler. REF (with metal ruler): ER2G-s (green), ER2Y-s (yellow), ER2V-s (violet). REF (without metal ruler): ER2GX-s (green), ER2YX-s (yellow), ER2VX-s (violet), ER2CVP-s (green, yellow, violet pack)

JORDCO® MIXING STICKS

CONVENIENT SINGLE-USE DESIGN
JORDCO MIXING STICKS provide finger-tip control for mixing most all cements and dental materials. Ideal flexibility to assure complete mixing. 50 pack of assorted colors. REF: JMS-s

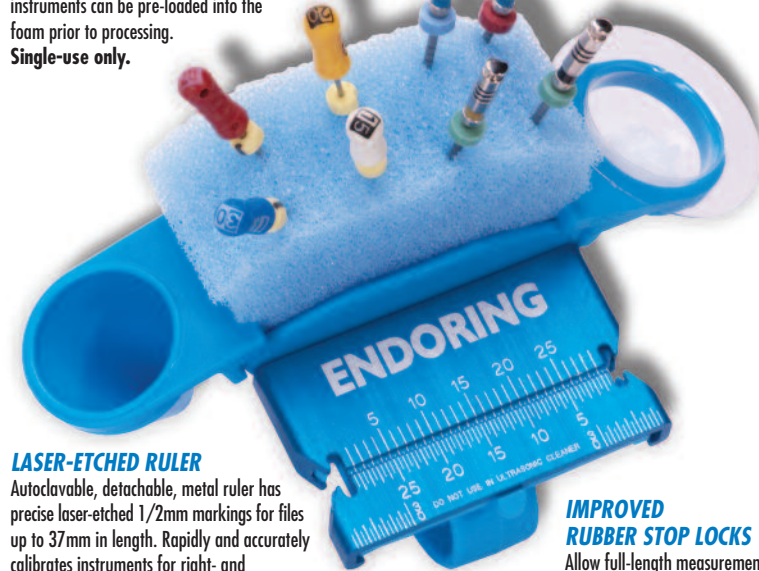

ENDORING® II WITH GELWELLS®

JORDCO'S E-FOAM

Open cell foam can be steam-autoclave processed prior to single use. For convenience, endodontic instruments can be pre-loaded into the foam prior to processing. Single-use only.

GELWELL SYSTEM

Disposable Gelwell cups store lubricating gels/liquids.

LASER-ETCHED RULER

Autoclavable, detachable, metal ruler has precise laser-etched 1/2mm markings for files up to 37mm in length. Rapidly and accurately calibrates instruments for right- and left-handed clinicians. Available in select kits and can be ordered separately

IMPROVED RUBBER STOP LOCKS

Allow full-length measurement using rubber stops.

WORN ON THE INDEX FINGER

Allows easy instrument calibration and storage while providing full use of clinician's hands.

ENDO DOCKING STATION™

Increased access to foam surface accommodates more instruments. Ideal for use with microscopes.

LASER-ETCHED RULER OPTIONS

Metal ruler options allow you to choose a model with or without the rubber stop locks.

Left-Handed No-Stop Lock
35mm REF: ERRFL-s

Standard with Stop Locks
30mm REF: ERR-s

Right-Handed No-Stop Lock
35mm REF: ERRFR-s

ENDORING® FILECADDY®

READY, SET, AUTOCLAVE!

Finally, you can autoclave and safely bulk-store endodontic instruments for chair-side use

SECURELY BULK-LOAD FILES INTO REPLACEABLE FOAM INSERT.

CLOSE LID AND IT'S READY TO PROCESS.

The ENDORING FILECADDY organizer provides a unique bulk storage solution for all endodontic files. Just place multiple files securely into the special foam insert, close the lid and steam autoclave the entire assembly. You're now ready for your next appointment.

REF: EFC-s Refill pack of 12 disposable foam inserts (EFCF-s)

FEATURES	BENEFITS
Self-Locking Lid	Holds files securely even if dropped or turned upside down
Autoclavable and Durable	Medical grade resin can withstand repeated steam autoclaving
4 Bulk-Storage Compartments	Organize files by size, length and type
Single-Use Foam Inserts	Reduce cross contamination
Easy-Open Lid	Single-handed operation to open and access contents

ENDORING® MARKING TABS™

EASILY IDENTIFY SET-UPS BEFORE APPOINTMENT

Save time and increase efficiency. Resin designed to withstand limited steam autoclaving and allows marking with indelible ink pens.

Three color EMTs allow you mark and identify e-Foam insert set-ups. Six numbered tabs snap off to indicate instrument usage. Each package includes 24 EMTs (8 red, 8 green and 8 blue). REF: EMT-s

ENDOGEL® FILE LUBRICATING GEL

IMPROVED MICRODOSE®

TUBE DELIVERY SYSTEM
ENDOGEL lubricant is packaged in 1ml MicroDose tubes to reduce cross contamination and simplify use.

ENDOGEL lubricant is the perfect companion for the ENDORING II organizer. Each MicroDose tube contains 1ml of EDTA lubricating gel. ENDOGEL can be easily delivered to the pulp chamber or placed into the Gelwell cups. REF: EG-s, EG-24

FEATURES	BENEFITS
Single-Use MicroDose Tube	Reduces cross contamination
Convenient Delivery	Polytube neck for precise placement
Water Soluble	Easily flushes out of canals

E-RULER™

The ruler's markings are precisely laser etched providing enhanced contrast for accurate and easy calibration of endodontic hand and rotary files. REF: ERUL-s (with Stop Locks), ERULX-s (without Stop Locks).

FEATURES	BENEFITS
30mm Laser-Etched Scale	Precise millimeter/numeric markings
Dual-Handed Ruler	For use by either right or left handed operators
Finger-Held Ring	Comfortably worn on the finger

PURE BOND DISPENSER®

Disposable, multi-purpose, light-protected storage wells for bonding agents and composites. Store light-sensitive bonding agents, sealants and composites in five wells protected by a light-locking lid. REF: PBD-s

FEATURES	BENEFITS
Increased Efficiency	Preload agent to save valuable chair and set-up time
Light-Protecting Lid	Prevents light contamination of bonding agents or composites
Compact Design	Easily held by assistant

PURE BUFF® POLISHING WHEEL SYSTEM

The PURE BUFF polishing wheel is used for safe, efficient and cost effective light duty polishing of dental acrylics. This unique product incorporates a disposable foam wheel, autoclavable mandrel and O-ring that can be used with most dental lathes. REF: PBK-s Refill pack of 48 disposable wheels (PBF-s)

FEATURES	BENEFITS
Single-Use Wheels	Reduces cross contamination
Efficient Design	Saves valuable chair time with each adjustment
Perfect for Spot Acrylic Adjustments	Appliance can be polished without prior disinfecting

PURE FLOSS DISPENSER®

A unique floss dispensing system in which the floss is suspended between the storage and cutting towers. This suspension of floss allows the operator to use a no-touch technique to dispense floss and reduce cross contamination. REF: PFD-s

FEATURES	BENEFITS
Durable Metal	Zinc housing and stainless steel cutter cap
No-Touch Dispensing	Use only one hand to dispense floss
Sanitary Design	Precise fit and finish reduces areas that can trap contaminants
