JEDMED

Comfort and Ergonomics

Getting your body into the proper position before any procedure is extremely important and one of the most overlooked, but necessary parts of every procedure. Sitting in the correct position can not only make the procedure more comfortable, but it can actually extend the years you can practice. The JEDMED Micro and Surgical Stool was designed with comfort and ergonomics in mind.

Shown in Portobello

Micro Stool Series

Shown in Portobello

The micro stool series is anatomically designed to give you hours of comfort when performing delicate procedures. Specially designed for microscopy, the fully adjustable armrests swing into position to give you a stable reference base for precise hand movements.

The pneumatic lift produces the proper height for your comfort and posture. The seat and backrest articulate independently to get you into a comfortable, ergonomic position while performing long, delicate procedures. The waterfall seat design relieves pressure on your femoral arteries and the lumbar support aids in correct posture.

Surgical Stool Series

Shown in Seville

The Surgical Stool series is anatomically designed with a choice of waterfall or saddle seat to give you hours of comfort when performing delicate procedures. Specially designed for surgical applications, the optional, fully adjustable armrests swing into position to give you a stable reference base for precise hand movements.

These stools are completely adjustable in seat tilt and backrest to create the custom position for your posture. Height adjustment is made easy via a foot lever and can be made while the surgeon is seated. These features make the JEDMED Surgical Stool an indispensable component of your operatory.
