

MoraVision™

For 25 years, Dr Assad Mora has been a world leader in pioneering and developing optical and 3D video solutions that brings comfort and efficiency to visualizing dentistry.

In 2007 Dr Mora introduced the MoraVision™3D System, a groundbreaking technological achievement, designed to replace the microscope and eliminate dependence on oculars. MoraVision™ enables the dentist to view the operating field, inside an oral cavity, on a 3D video monitor in real time and with accurate depth perception. For the first time dentist can work with amazing visual acuity and maximum postural comfort, without the usual leaning and craning over the patient.

MoraVision™3D brings freedom and precision to the practice of dentistry and unprecedented conceptual clarity to clinical dental education.
