

A New Era in Dental Equipment & Design

A practical approach to flexible, turn-key dental treatment suites.

- ▶ Open & Spacious Treatment Suites
- ▶ Adaptable for Multi-Specialty Needs
- ▶ Modular Design Freedom

Advanced Dental Systems® & Advanced Endodontic Systems®

The ASI Difference & What It Can Do For You

▶ Custom Integration

ASI has set the standard of integration to the highest level among dental delivery systems by providing a fully integrated solution, which eliminates clutter from the treatment suite.

Modular Instrument Panel – Seamless integration of a complete range of dental instrumentation.

Your Preferred Instruments – ASI integrates your preferred brands of instruments into one delivery system.

Complete Control at Your Fingertips – Choose the location of each instrument according to how you practice.

▶ All Your Instruments, Just One Foot Control

A distinctive feature of ASI's Advanced Dental Systems® and Advanced Endodontic Systems® is the ability to operate numerous unique handpieces from only one foot control.

▶ Enhance Patient Experience

ASI's advanced technology offers superior quality with simple reliability. Instrument integration streamlines procedures and eliminates visible clutter – giving peace of mind to your patients.

Stay
in the Zone

Focus on outcomes,
not a cluttered
workspace.

▶ Made in the USA

Based in Colorado, ASI has been manufacturing dental systems for 25 years. We're proud to have our manufacturing processes approved and registered to ISO 13485, the highest quality systems certification for medical devices, exceeding the requirements of ISO 9001.

Create Your Perfect Treatment Suite

Build a State-of-the-Art Office with Spacious Treatment Suites in Practical Ways

ASI's space-saving designs create different ways to setup treatment suites that do not exist with traditional side and rear cabinetry. Our systems adapt to a number of room layouts, sizes, and dual- and single-entry scenarios. Their mobility solves ambidextrous challenges.

Our total solution package is a flexible, cart-based delivery for both Doctor and Assistant. The modular platform creates freedom in design, providing superior ergonomic function and the ability to update with newly emerging technology.

Plug-n-play functionality means adding equipment only as necessary. Grow your practice at your own pace while avoiding additional construction & equipment costs.

- The **Designer Series** consists of ASI's most versatile, full-featured systems. Designed with a high-end look for state-of-the-art treatment suites, the spacious Designer Series accommodates the widest range of features and instrumentation.

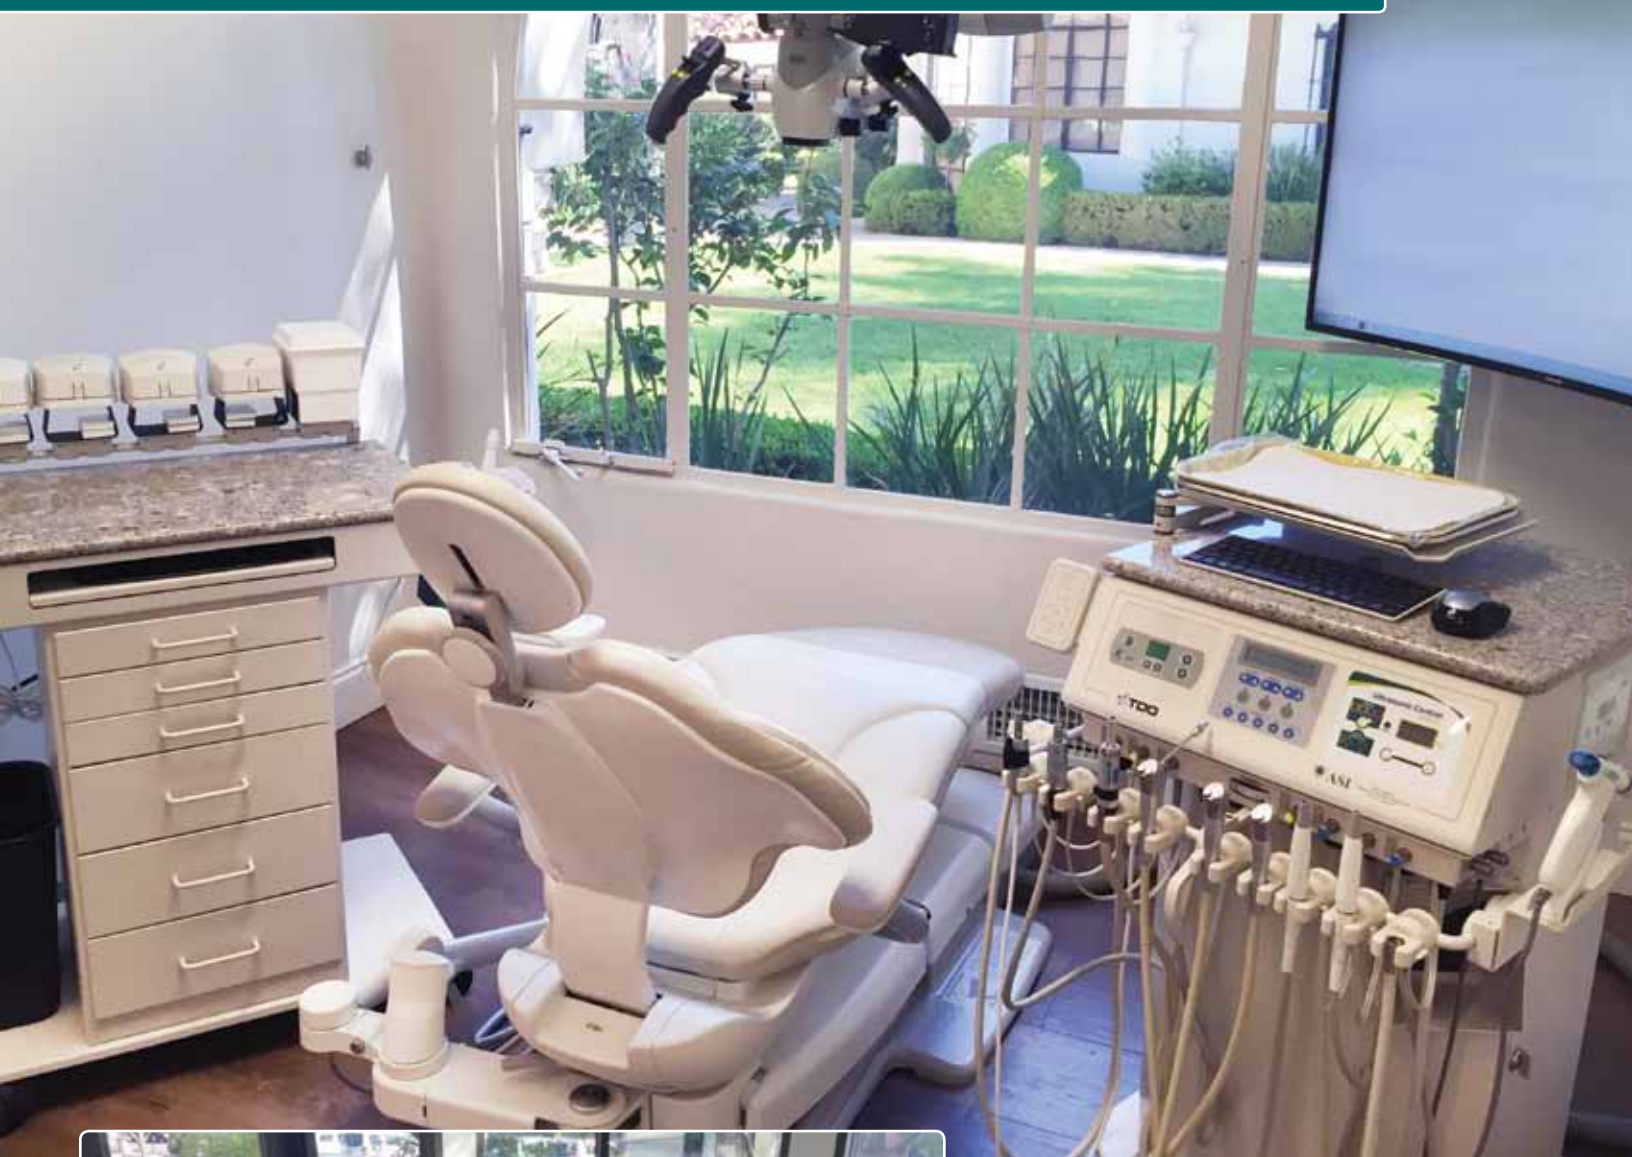

Configure Your System
with as many or as few options
as *YOU* need.

- The **Classic Series** offers full-featured systems designed to fit into most sizes of treatment suites. The smaller footprint accommodates a variety of popular instrument configurations.

*Sample, Full-instrumentation configurations shown. Configure your system for the way you practice at www.asidental.com.

That are Unrealized with Conventional Dental Equipment & Cabinetry.

Instrument Integration

What Can I Integrate?

About Integration

These fully functioning systems come standard with air driven handpiece connections, an air/water syringe and an air only syringe. ASI's unique modular panel allows full instrument integration. Your selected instruments are placed in the order you choose and include a specialized instrument holder. Operation is streamlined through a single foot control.

Root ZX II

• Apex Locators

• Electric Motors

Dual Electric Motors

Curing Light

- Illumination Instruments
- Obturation & Heat Sources
- Unique Instrumentation

Integrated obturation with specialized heat shield

• Dual Digital Ultrasonic

Dual handpiece option allows use of different tips and power settings for each handpiece.

• ASI's RootDown™ Irrigation

Convenient way to deliver up to three irrigant solutions.

• Titanium Suction Handpieces

Featuring the Micro Evacuator & Ergo Angle HVE. Straight HVE & Saliva Ejector also available.

Delivery System Options

How Can I Customize My System for the Way I Practice?

Customize Your System:

- Instrumentation, Integration, & Configuration Options
- Brackets & Trays
- Computer Hardware Storage & Mounting Options
- Additional Storage Solutions
- USB Device Connectivity
- Paint, Silestone®, Door & Drawer Color Options
- Casters for Height & Mobility

Rail Storage System Accessories Tray

ASI's Unique Rail Storage System Allows Custom Configuration with an Array of Storage Options

Designer Assistant's Flex System Shown with Optional Sliding Monitor Mount (monitor not included), USB Connectivity, and Rail System Storage Bins & Brackets

ASI's Vice Bracket is designed for small table top instruments such as apex locators. Various mounting options available.

Utility Management

Tying It All Together

IN-WALL JUNCTION BOX | FLOOR JUNCTION BOX | TECH WALL

Organization for Your Utility Connections

ASI's Junction Boxes keep wiring and utilities safely and attractively hidden from view. Computer connections can also be easily organized along with standard utilities. Easy access to the foot control can be achieved without tubing running across the floor.

In-Wall and Floor Junction Box options are available.
