Obtura Spartan Ultrasonic Tips

Power Settings:

In general, start with a lower setting and only incrementally increase the power if necessary to safely accomplish the procedure.

**The power settings used are determined by the clinician's experience with ultrasonics and the power needed to safely complete the specific procedure. *Indicated power settings are intended for use with Obtura Spartan ultrasonic units. Setting may not be appropriate for other units.*

**See Instruction Manual for Use.*

Water port for cooler operation and safety

Synthetic-diamond coating with gold plating that improves cutting efficiency

Allows enhanced vision for better access vs. high speed handpiece

BUC[®] Ultrasonic Tips ACCESS REFINEMENT

BUC-1

Rounded tip eliminates clefts and ditches in the pulp chamber floor

BUC-1A

Aids in the opening of the isthmus between canals in the same root

BUC-2

Disk-like tip allows you to horizontally smooth pulp chamber floor

BUC-2A

Smaller diameter allows for precise smoothing around corners

BUC-3

Extremely active tip for cutting apically into calcified canals and troughing around posts

BUC-3A

Designed for troughing around broken instruments in the coronal half of the root

CPR[®] Ultrasonic Tips RETREATMENT

CPR-1

For vibrating posts and cores, and aiding in crown and bridge removal

CPR-2D

This versatile and durable tip provides enhanced energy for removal of core materials

CPR-3D

Smaller taper sub-orifice tip used to remove obstructions in the canal

CPR-4D

Smaller taper sub-orifice tip used to remove obstructions in the canal

CPR-5D

Smaller taper sub-orifice tip used to remove obstructions in the canal

CPR-6

Combines the flexibility and strength of a titanium alloy tip with the proven cutting ability of a CPR tip

CPR-7

Longer than the CPR 6, but with the same flexibility, strength and cutting ability

CPR-8

Our longest and thinnest tip available allows access to the deepest obstructions in the canal

Ultrasonic Accessories

Tip Taxi

Designed to hold all of Obtura Spartan's endodontic ultrasonic instruments. Organizes tips and wrench, eliminating needless loss. Autoclavable.

Endo File Adapter

The Endo File Adapter is designed to function on most brands of Piezo-Electric type dental ultrasonic power units with standard M3x.6 threading. The adapter can accommodate K Type file sizes 15-40 once the handle or latch hub has been removed.

MTS Ultrasonic Unit

The MTS is the premier multi-task system for all procedures such as endodontics, periodontics, and restorative dentistry. When using magnification and Obtura Spartan Endodontic's specialized instruments, this complete system allows you to perform to your exact standards.

Tip Wrench

Specifically designed for all Obtura Spartan tips including: BUC Access Refinement, CPR, SL Micro-restorative, KiS Microsurgical, File Adapter and Scaling Tips.

BUC Ultrasonic Tips

- 930-041 BUC 1
