

TDO IS A SMARTER WAY TO PRACTICE

Are you next? Find out why everyone is switching to TDO - The Digital Office for Endodontists.

- Only TDO seamlessly integrates digital radiography, QuickBooks, Microsoft Word and many other important applications all into one program.
- By joining TDO, you get access to hundreds of clinical cases each week through TDO Clinical, TDO Chat, TDO Implants and other online forums.
- The gold standard in clinical documentation, there simply is no better legal protection than TDO.
- TDO is the only endodontic software company that has 100% HIPAA and PIPEDA compliant two-way interactive and integrated patient and referral communication systems.
- TDO automatically organizes all of your cases for easy incorporation into lectures or case presentations.
- Our built-in case generator takes all the stress out of preparing cases for submission to the ABE by automatically putting them in the approved format.
- TDO technical support has the highest user satisfaction rating in our specialty. Contact us today through the web, your smart phone, email, phone or live support.

THREE GREAT PRODUCTS. ONE GREAT COMPANY.

Can a software program make your life better? Our users say it can. TDO Practice Management Software, TDO Cloud and TDO Mobile are an integrated system designed to function the way an endodontist actually works. Our practice management software walks you through all possible diagnosis and treatment options to make sure you don't miss a single step in the care of a patient. TDO Cloud strengthens relationships with referring doctors by allowing them to check the status of all referred patients online, including patient radiographs and photographs. TDO Mobile makes patient records easily accessible when you're away from the office. The best part is the increased efficiency and productivity that you will enjoy. TDO is the most complete practice management system for endodontists.

TDO Practice Management Software

We specialize in endodontics and our software is better for it. Every detail of our practice management software has been carefully thought out to make you a more complete clinician and help your office run more efficiently. Our diagnosis page is the most comprehensive radiographic and clinical examination form ever seen in a dental software program. Our draw Page makes communication with patients powerful and compelling. Our customizable templates and reporting features allow you to stay in touch with referring dentists with a simple click of the mouse.

The TDO Infograbber

TDO Infograbber is an application that runs on a Tablet PC and comes with TDO Practice Management Software. Patients can digitally fill out their medical and pain histories, review and sign all consent forms right on the Tablet PC – once they're finished, Infograbber seamlessly transfers all their information to your TDO database, dramatically speeding up patient registration and check-in.

→ Intuitive, Easy-to-Use Interface → Unequalled Imaging Engine
→ Customizable Reporting → No Double Entries

DO YOU RUN YOUR PRACTICE OR DOES YOUR PRACTICE RUN YOU?

TDO Cloud Services

TDO Cloud makes it easy to communicate with referring doctors. With TDO Cloud, a report automatically becomes accessible on your website the minute you finish a case. Subscribing to TDO Cloud also saves valuable time by allowing patients to register and fill out medical history forms in the comfort of their own home. The ultimate complement to a paperless office, TDO Cloud is an effortless way to promote your practice that comes complete with your own unique web domain and template, email accounts and secure daily off-site backup of your TDO data. Save thousands by eliminating the need to contact with an outside vendor.

- Practice Website Included → Real-Time Access to Latest Data
- Easy 24/7 Content Management System → Ability to Link Multiple Practices

TDO Mobile

With TDO Mobile, you can connect to your office anywhere, anytime right through your iPhone or Android. You have the ability to check drug interactions when you're out of the office as well as view patient pre- and post-op x-rays and other important images. Access patient contact information, pain history and other clinical data whenever you need it. Doctors and staff love TDO Mobile's calendar, notes and reporting features. TDO Mobile makes it easy to stay in touch with patients and referring doctors when you're away from the computer.

The TDO Community

When you join TDO you also gain access to such features as the highly popular TDO Chat, one of our many free online forums where endodontists advise each other on everything from clinical case management to the latest endodontic products.

- Unlimited iPhone or Android per TDO Mobile Account → View Medication Detail
- Appointment Synchronization → Access All Patient Record Details

TDO Mobile and TDO Cloud are optional, subscription-based services not included with TDO Practice Management Software.

TDO FOR POSTGRADS

As a resident, the prospect of starting your own practice can be intimidating. It needn't be. TDO takes all the stress out of planning your own practice and saves you thousands of dollars by helping you avoid costly mistakes. TDO's online forums will advise you on everything from floor plans and office design to working ergonomically with the microscope. You'll learn to master microscopic photography and improve your clinical skills. With our special rate for postgraduate students, you don't have to wait until you graduate to start developing an ergonomic understanding of how to work. You can start right now.

Ergonomics

We can't emphasize enough the importance of having an ergonomically designed office. No one understands efficient ergonomic workflow better than TDO because it was we who first introduced the microscope into the endodontist's office in the first place.

Photography

Endodontic photography is a difficult skill. It's also an important way to build your practice. TDO founder Dr. Gary Carr was the first endodontist to start taking clinical photos through the microscope, and over the years we've taught hundreds of doctors proper photo documentation techniques.

Office Design

The plumbing. The flooring. The electrical. The cart. By joining TDO, you'll be able to post questions about anything and everything and hear back almost immediately from many other practitioners who have just gone through the process. Build a better practice with TDO!

→ Excellence → Mentoring → Innovation → Integrity → Service

CARR ULTRASONIC TIPS

GENERAL USE / MULTI-USE TIPS

WH1

- Powerful and accurate cutting
- The oblique bend enhances visibility and creates more power at the tip
- Rounded point for smoother cutting

WH1-D

- Troughs canals
- Removes restorative materials
- Rounded point for smoother cutting

WH2

- Powerful and accurate cutting
- Powerful scaling ability

WH2-D

- Troughs canals
- Removes restorable materials

CT4

- Troughs canals
- Removes restorative materials, cements, silver (Ag) points, posts and Therafil carriers

CT4-D

- Troughs canals
- Rounded point

CKT1

- Point Measurement: .60mm
- Generates extremely precise troughing grooves
- Removes restorative materials and other build-up materials

CKT2

- Point Measurement: .40mm
- Generates extremely precise troughing grooves
- Removes restorative materials and other build-up materials

CKT3

- Point Measurement: .35mm
- Generates extremely precise troughing grooves
- Removes restorative materials and other build-up materials

CKT1-D

- Point Measurement: .75mm
- Creates a flat troughing groove
- Finds calcified canals, removes build up and restorative materials
- Preparation of buccal Class VI and ECIR Lesions
- Refines and cleans orifice opening
- Very good at cleaning Gutta
- Percha and sealer off orifice walls

CKT2-D

- Point Measurement: .50mm
- Creates a flat troughing groove
- Finds calcified canals, removes build up and restorative materials
- Preparation of buccal Class VI and ECIR Lesions
- Refines and cleans orifice opening

CKT3-D

- Point Measurement: .40mm
- Creates a flat troughing groove
- Finds calcified canals, removes build-up and restorative materials
- Preparation of buccal Class VI and ECIR Lesions
- Refines and cleans orifice opening

VIBRATING, TROUGHING, INSTRUMENT REMOVAL AND GENERAL USE

Dr. Gary B. Carr is the original inventor and developer of ultrasonic tips for endodontics. Initially developed in 1987 as an adjunct for a surgical endodontics, their use has expanded so that they are today indispensable for all areas of endodontic treatment and re-treatment.

ENDO WRENCH

This wrench is engraved with the Excellence in Endodontics logo and a 40mm scale on the back side. One end of the wrench features a slot for tightening your ultrasonic tips, the other side features a smaller slot for tightening our bendable mirror heads.

CARR ULTRASONIC TIPS

VIBRATING TIPS

VT-1

- End Diameter: 1.65mm
- Post and Crown Removal
- Standard Vibrating Ultrasonic Tip
- Condenses Amalgam

VT-2

- End Diameter: 1.25mm
- Post and Crown Removal
- Cleans the Access Cavity and Orifices
- Condenses Amalgam

VT-3

- End Diameter: 2.85mm
- Post and Crown Removal

VT-4

- End Diameter: 2mm
- Post and Crown Removal
- Condenses Amalgam

BALL-D

- End Diameter: 1mm
- Wide Troughing
- Cleans Access Cavities
- Refines Crown Prep Margins
- Refines Box Preps

PEAR-D

- End Diameter: 1.15mm
- Post and Crown Removal
- Cleans the Access Cavity and Orifices

INSTRUMENT REMOVAL / FINE TROUGHING

SP1 (Open)

- Removes separated instruments, silver (Ag) points and thermafil carriers
- Very fine troughing around posts to remove cement layers

SP1 (Closed)

- Removes separated instruments, silver (Ag) points and thermafil carriers
- Very fine troughing around posts to remove cement layers

SP2 (Open)

- Removes separated instruments, silver (Ag) points and thermafil carriers
- Very fine troughing around posts to remove cement layers
- Finer and thinner than the SP1

SP2 (Closed)

- Removes separated instruments, silver (Ag) points and thermafil carriers
- Very fine troughing around posts to remove cement layers
- Finer and thinner than the SP1

UT4

- Removes separated instruments
- Finds calcified canals

UT4-D

- Troughs canals

SJ4

- A finer version of the UT4
- Extremely fine troughing
- Removes separated instruments

CARR HD PHOTO MIRRORS

MICRO-MIRRORS & GENERAL USE

Our mirrors, developed by Dr. Gary B. Carr, provide exceptional clarity and reflection that reflect 97% of visible light. Rhodium mirrors only reflect 75% of visible light. Our mirrors have exceptional flatness and our special dielectric coating is layered on twelve times to create this effect. These mirrors are invaluable for photography through a microscope or for difficult cases where optical clarity is needed. Please note that these mirrors can only be sterilized with non-glutaraldehyde sterilizing solutions like Compliance or Sporox.

■ AMBIDEXTROUS MEASURING HANDLE & ADAPTER

This lightweight surgical grade stainless steel made in the USA measuring handle is made to last. Fully ambidextrous for both right handed and left handed users, existing customers will be familiar with the measuring layout. Instead of half mm dashes, we replaced them with dots so it is easier to differentiate between the two. Our patent pending adapter system allows one handle to work with both style mirrors that we sell. In the future this platform will allow us to expand the adapter system to fit any thread type.

ACCESSORIES

ENDO WRENCH

This wrench is engraved with the Excellence in Endodontics logo and a 40mm scale on the back side. One end of the wrench features a slot for tightening your ultrasonic tips, the other side features a smaller slot for tightening our bendable mirror heads.

TAPER PLATE

Designed by TDO Software user Dr. Scott Martin, this high quality American made taper plate is designed for many years of use. Superior to plastic models which can warp, wear, and discolor, this stainless steel taper plate will keep accurate measurements and be easy to clean. This taper plate is the only one on the market with quarter size measuring increments which is essential for precision cone fitting.

ASI ERGO HANDLE HVE + TSUTSUI MICROSUCTION

ASI's titanium Ergo Angle is a high volume evacuation (HVE) hand piece. The angled design reduces hand and wrist fatigue associated with the use of straight high volume suction hand pieces and features ASI's exclusive single-side valve design. It fits standard 1/2" HVE tubing. It allows for ideal ergonomic technique and permits the assistant to suction with either the right or left hand easily.

TSUTSUI SUCTION TIPS (INDIVIDUAL)

Connects to either high-speed suction or saliva ejector suction to assist in suctioning canals. Useful for cases with significant drainage or suppuration. Fits on 1/4 inch tubes or saliva ejector and used with disposable capillary suction tips (not included).

Can also be used to dry canals after irrigating with alcohol. Dramatically reduces need for paper points to dry canals.

ACCESSORIES

70mm ASSISTANT SCOPE EXTENDERS

Our assistant scope extensions free up 70mm of space to help with proper ergonomics, posture and positioning.

Available for both the Zeiss and Global Microscopes.

QUICKSPLINT COMBO PACK

QuickSplint is an interim, multi-purpose, custom-fit, bite plane that takes only minutes to fabricate and has dozens of practical uses in dentistry. Whether you are a general dentist or a specialist, QuickSplint comes to your aid to help diagnose, treat, protect, and heal your patients.

TDO USER MEETINGS

Learn to better manage your team, pick up new documentation photography tips and tricks, streamline your assistant training and many more topics are covered at our yearly TDO user meetings.
