

Bratt Systems started out building gamer machines in 2003. We then became Information Technology providers serving South Florida. In 2008 We were introduced to the world of Endodontics by Dr. Russell Stoch . Dr. Stoch then opened our eyes to the technology needs of the Endo community.

We now serve clients both international and domestic. We custom built and configure servers and clinical workstations to the optimal specifications of your practice management software, Be it TDO, PBSendo, Endovision , DentalEMR, Dentrux and more!

DEPENDING ON YOUR PRACTICE MANAGEMENT SOFTWARE , IN ABOUT 1 HOUR FOLLOWING A CATASTROPHIC SERVER EVENT, YOU WILL BE UP AND RUNNING. No need to cancel patients. This is the technology and planning that we bring to the table! We work with your IT, to make your office run better!

Our Mission:

Our mission is simple, we strive to bring the latest technology to our client's chair side. with speed, accuracy and awesome customer service and satisfaction.
