CHRONIC VENOUS DISEASE PRODUCT OPTIONS

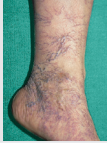

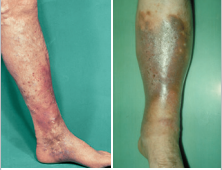

Medical compression is a firmly established treatment for venous and lymphatic conditions, as well as for venous symptoms in healthy people. Robust evidence is published regarding the use of medical compression stockings for management of venous symptoms, prevention and treatment of venous edema and management of venous ulcers (*Rabe et al., 2018*).*

◆ Day Wear ◆ Night Wear

	
Style Sheer	Style Soft Opaque
Fashionable, sheer medical graduated compression hosiery	Graduated compression with lasting microfiber softness, advanced moisture management, and opaque colors

Available Compression Strengths (measured in mmHg)

15–20 20–30 30–40 15–20 20–30 30–40

Chronic Venous Insufficiency	CEAP Classification**		Diagnosis	Aim of Compression						
					15–20		20–30		30–40	
	C0		No visible or palpable signs of venous disease but high risk from pregnancy or hereditary disease	Prevention of swelling, heavy legs, tenderness, pain, and DVT	◆		◆			
	C1		Telangiectasia or reticular veins (spider veins)	Prevention of swelling, heavy legs, tenderness and pain	◆	◆	◆	◆	◆	◆
	C2		Varicose Veins	Vein support, prevention of swelling, heavy legs, tenderness, and pain	◆	◆	◆	◆	◆	◆
	C3		Edema	Edema reduction		◆	◆		◆	◆
	C4		3 subclasses: a) pigmentation changes (hemosiderin staining) or eczema b) Lipodermatosclerosis or atrophie blanche c) Corona Phlebectatica	Prevention of ulceration		◆	◆		◆	◆
	C5		Healed venous ulcer	Prevention of ulcer recurrence		◆	◆		◆	◆
	C6		Active venous ulcer	Ulcer closure, pain relief, vein support						
Other	Phlebo-Lymphedema		Accumulation of fluid, protein and other elements in the tissue/ interstitial spaces	Reduction of edema

LYMPHEDEMA WEAR

“Decongestive Lymphatic Therapy (DLT) which consists of compression, exercise, manual lymphatic therapy and skin care, is the universally accepted basis of conservative treatment for lymphedema. Among its components, compression is the most important single measure which cannot be replaced by any other modality.” **(Rockson, 2018).***

◆ Day Wear ◆ Night Wear

Lymphedema		
Mild	Moderate	Severe
Swelling, tightness, leg heaviness, tingling in the affected extremity	Visible/Palpable skin changes, may exhibit “pitting” when pressed gently	Hard, scaly and enlarged extremities, lymphorrhea (weeping) may be present on skin with risk of skin denudement

Product		Description	Range of Strength (mmHg)			
		Secure Graduated compression and high containment hybrid garment	20–30	◆	◆	
			30–40	◆	◆	
			40–50	◆	◆	
		Coolflex Graduated compression with visual indicator of compression level; breathable mesh for cool and comfortable fit	20–30		◆ ◆	◆ ◆
			30–40		◆ ◆	◆ ◆
			40–50		◆ ◆	◆ ◆
		Compreflex Graduated, short-stretch compression; each garment includes Accutab® compression measuring devices	20–30	◆ ◆	◆ ◆	
			30–40	◆ ◆	◆ ◆	
			40–50	◆ ◆	◆ ◆	
		Comprefit Active, inelastic, graduated compression garment, providing high levels of containment	20–50	◆ ◆	◆ ◆	
		Compreflex Reduce Short-stretch compression garment used as a replacement for bandage wrapping; garment is customizable and used throughout therapy	Variable		◆ ◆ ◆ ◆ ◆ ◆	◆ ◆ ◆ ◆ ◆ ◆
		Chipsleeve® Open-cell foam chip garment, promotes fluid movement and tissue softening, comfortable nightwear	20–25 (with Oversleeve)	◆	◆	◆
		Medaform® Highly adjustable garment; promotes lymph drainage and provides maximum containment	30–40		◆ ◆	◆ ◆
