

# ExpertusONE™ Learning Platform

ONE integrated platform to meet all the learning needs of today's enterprises

# Learning for the Boundaryless Enterprise

Today's enterprise learning and training environments are more complex than ever. Work is no longer defined by traditional job roles & boundaries. The workplace is not confined to corporate offices. Learning & training is not limited to just internal employees.

Meeting the needs of today's boundaryless enterprise requires a shift in learning & training. Cobbled together legacy learning systems often fail to provide the seamless digital experiences we have all come to expect. These outdated and siloed learning solutions are unable to deliver truly personalized learning and training experiences within the context of everyday work. The result is a cycle where companies continue to add technologies to band-aid the problems while continuing to see poor results and diminishing returns.

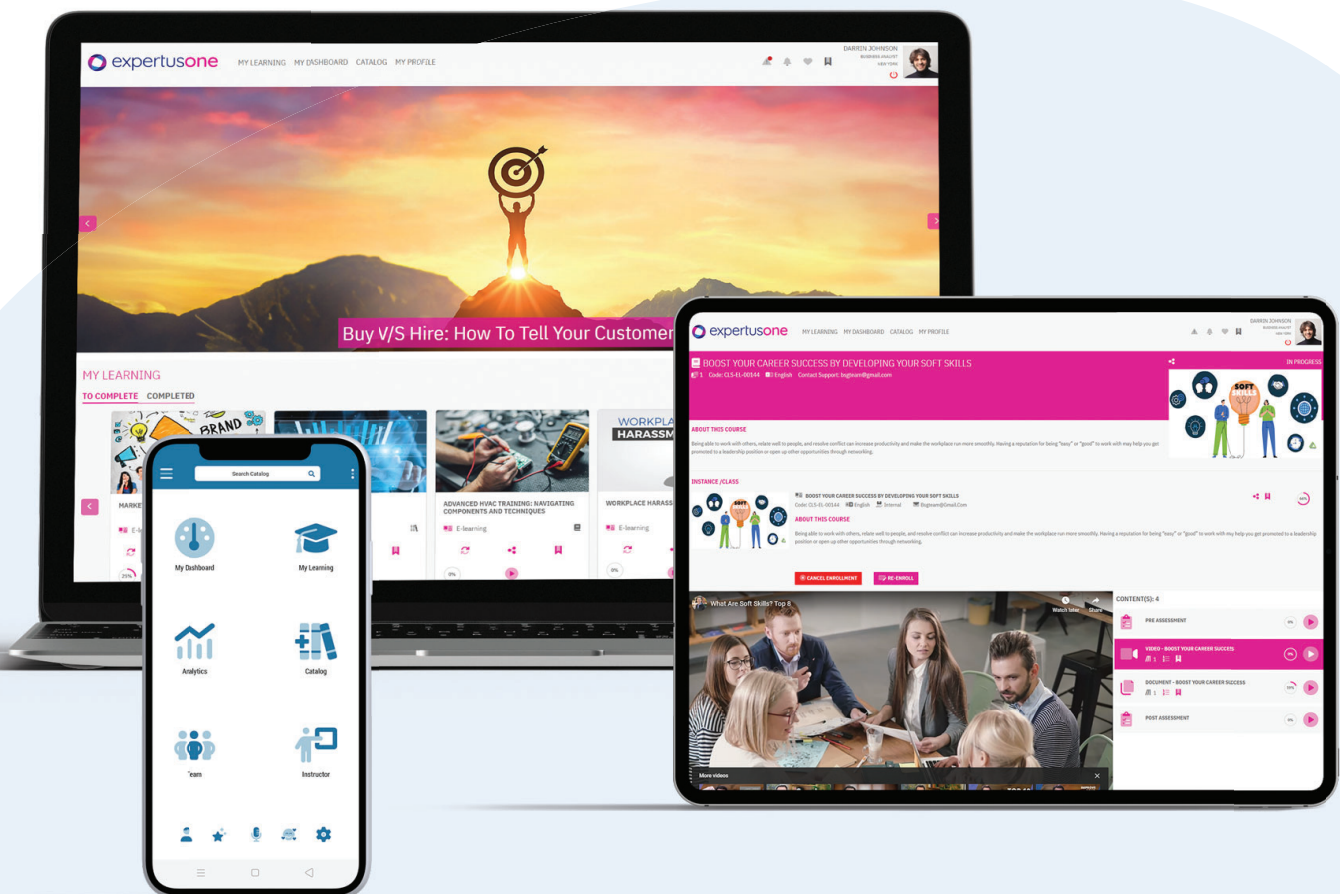

It's time to move on from these costly and ineffective legacy systems to a learning & training solution purpose-built for today's boundaryless enterprise.

# ExpertusONE: An All-in-One Integrated Learning Platform

Meet ExpertusONE, a fully integrated platform used by modern enterprises to provide the highest degree of personalized learning and training with best-in-class user and admin experiences. ExpertusONE combines the key features of LMS, LXP and Skills to provide enterprise audiences with the most intuitive and seamless learning experiences, delivered within the flow of users' day to day work.

Whether it is customized onboarding programs for your new employees, critical compliance training and certification for factory workers and partners, or ensuring that customers are receiving the right product knowhow, ExpertusONE's AI driven engine ensures that all parts of the system are working together to deliver users personalized learning & training experiences where they are and when they need it.

# Why ExpertusONE: What Sets Us Apart

ExpertusONE's enterprise-grade learning platform provides unparalleled flexibility, integration and scale, which companies like Siemens, Hitachi, United Rentals and ABB utilize for their critical learning and training needs. With ExpertusONE you get:

## A Purpose-Built All-in-One Learning Platform

Engineered by learning industry leaders as a fully integrated learning platform, combining the power of an LMS, the richness and personalization of an LXP and the high-impact functionality of a Skills platform.

## Industry Leading Workflow Integration

The highest degree of integration into learners' flow of work to optimize engagement & retention, with both out-of-the-box and custom API-based solutions.

## Unparalleled Personalization of the User Experience

An unmatched level of personalization at the individual learner level, driven by an industry leading AI-based recommendation engine based on 20 years of enterprise learning data.

## Total Administrative Control - with the Fewest Clicks

Complete control for learning administrators and managers, enabling the highest level of manageability, compliance oversight, analysis and reporting, all with the ease of just a few clicks.

# Get to Know Some of our Award-Winning Features

With a truly integrated all-in-one learning platform, ExpertusONE is able to offer features and experiences that legacy learning systems simply cannot, including:

---

## **Best-in-Class Compliance & Certification Management**

Streamlined administration workflows give you access to data anytime, anywhere to manage rosters and run compliance reports, including a revolutionary interface that allows managers, executives, and administrators to personalize and automate their specific dashboard, data and reporting needs.

## **Native Social & Gamification Experiences**

Social features and gamification are natively built into users' desktop and mobile experiences to improve learner, manager, and instructor engagement & productivity.

## **ExpertusONE Apps for Salesforce, Microsoft Teams and Slack**

Meet learners where they work with industry leading apps to deliver in-context learning and training experiences within the applications they are already using every day.

## **Headless Learning & Training**

ExpertusONE offers a range of sophisticated tools for "Headless Learning" that allows users to browse, enroll in, and begin courses without having to access the learning platform directly. Smart reminders, soft nudges, embeddable widgets, and AI-powered recommendations are some of the main features that make this possible.

## **A Unified Learning Record Store**

With the first of its kind learning record store (LRS), ExpertusONE makes it easy to find, record, and manage all of your users' learning

experiences in real-time using Experience API (xAPI) standards, simplifying the process of keeping track of and analyzing learning data.

## **Interaction Studio Rapid Content Authoring**

The ExpertusONE Interaction Studio makes it possible for administrators and managers to quickly develop and launch highly consumable content with xAPI compliant microlearning, without having to learn a complex authoring tool.

## **Skills Platform & Integrated Observation Checklist**

The ExpertusONE integrated skills development solution and Observation Checklist enables you to develop and track key employee skills and competencies. The solution creates baselines for employee skills, identifies areas that need improvement, delivers relevant training content, and can demonstrate compliance/capabilities to executives or regulatory agencies.

## **ONE-Profile Card Certification & Competency Verification**

Sharing information on competencies and certifications has always been a cumbersome process that requires scanning, sending, and re-sending documents between multiple sources. With ExpertusONE's award winning ONE-Profile card, you can verify proficiency anytime, anywhere in seconds with a card or QR code that, when scanned, immediately populates with skills & certifications. It's a single-step process to show that you have the right person for the job.
