

When a Veteran or First Responder's life is on the line due to substance use or mental health issues, ***who do you call?***

**Haven for Heroes is here to help.**

Haven for Heroes is a treatment program created by First Responders for First Responders, providing tailor-made treatment for those serving on the front lines.

My name is Billy Cinkay, and I served proudly in law enforcement for 13 years. Tragedy struck and I lost my career due to an alcohol related incident. I am now the Sergeant in Recovery and have dedicated my life to preventing my fellow First Responders from committing the same mistakes I made. I would love to attend your roll calls and begin the process of training your team on how to get the help they may need, efficiently and confidentially.

We offer a 15 to 20-minute roll call training, which touches the surface on what to expect in treatment, and the advantages of a First Responder Treatment program.
